

Gate Anchor Mounting Instructions

Installing a gate anchor is quick and straightforward

All the necessary hardware to make installation as easy as possible

Put the supplied U-bolts around the round tube gate, install the included nuts, and tighten them. Attach clamps to the gate and slide over the post bolts. (It may help to use a shim beneath the gate to find the desired gate height)

Once installed, you'll enjoy the peace of mind that comes with knowing your gate is secure and in the perfect position.

*The gate anchor also has the ability to be mounted horizontally, so it can be used as a slide latch.
