

BUSHEL *and* BERRY®

BerryBux®

'ZF08-095' | PP 25,467 | CPBR 5,497 | 600 chill hours

BerryBux® looks like a boxwood, but has the bonus of blueberries! Its boxwood-like foliage and compact habit make it perfect for planting as a hedge or in groups in the garden. With the addition of white flowers that ripen into a dramatic display of wild and aromatic tasting berries, this variety is a treat unlike any other! It's easy to care for with very little pruning needed.

Zones: 5–8

Exposure: Full Sun

Size: 2-3 feet h, Mounded

Berry Size: Medium to Large

Fruit Season: Summer

Planting Instructions-

First, determine a suitable planting location. Then, dig a hole 3x as wide as the root ball of your plant. This makes it easier for your Blueberry to root in the surrounding soil. The hole should be deep enough that your plant will sit evenly or slightly above the ground around it. Next, mix your native soil with a bag or two of good quality garden soil or composted manure. Backfill the hole with the soil mixture around your plant. Afterward, water your new planting 2-3 times per week for the first growing season.
