

BUSHEL *and* BERRY®

'Perpetua'

'PERPETUA' | PP 24,209 | CPBR 5,880 | 1,000+ chill hours

'Perpetua' will give you two crops of sweet and delicious blueberries! The first fruit will appear in mid-summer, and then the plant will flower and set fruit a second time in the fall. The leaves are dark green and will turn to deep reds and greens in the winter, making it a beautiful addition to any landscape.

Zones: 4–8

Exposure: Full Sun

Size: 4-5 feet h, Mounded

Berry Size: Small

Fruit Season: Summer

Planting Instructions-

First, determine a suitable planting location. Then, dig a hole 3x as wide as the root ball of your plant. This makes it easier for your Blueberry to root in the surrounding soil. The hole should be deep enough that your plant will sit evenly or slightly above the ground around it. Next, mix your native soil with a bag or two of good quality garden soil or composted manure. Backfill the hole with the soil mixture around your plant. Afterward, water your new planting 2-3 times per week for the first growing season.
