Solar Motion Sensing Wall Light **USER MANUAL**

TECHKO[®]

Model: STL-2502

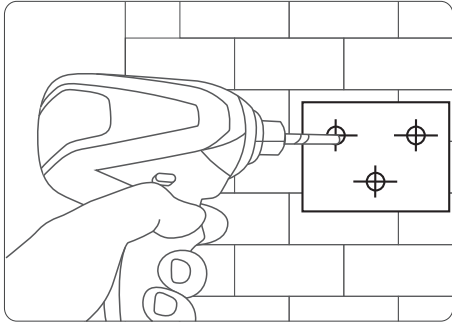

▲ Please carefully read this manual before using the product.

▲ Keep the manual with you for reference as needed.

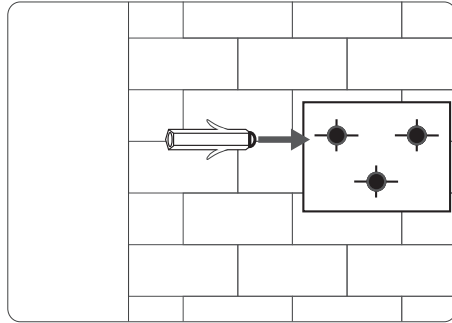

FULLY CHARGE BEFORE USE

Solar charging time may vary depending on weather conditions, temperature and seasons.

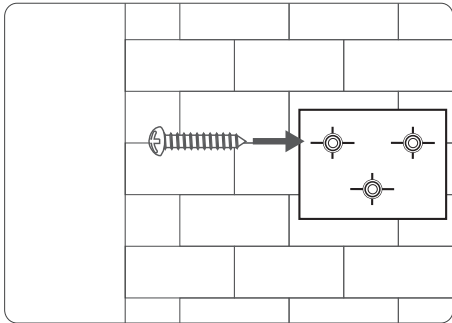

INSTALLATION INSTRUCTIONS

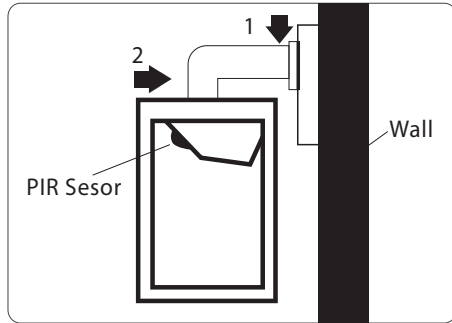

1. Place the mounting sticker in a location where the product will be installed to. Then drill 2 holes into the guides shown on the mounting sticker.

2. Insert the supplied anchors into the drilled holes.

3. Mount the wall bracket against the wall and then use a screwdriver to secure the bracket with the provided screws.

4. Push the back of the solar unit against the unit bracket, then slide the unit down to secure the unit to the bracket.

SOLAR CHARGING

▲ Charge the unit in the place where the solar panel can be continually exposed to the sun.

▲ Avoid placing the unit where shade from buildings or objects which would block the solar panel while charging.

▲ The solar panel is equipped with a daylight sensor, so the product will automatically charge in daytime and light up at dusk or when the surroundings turn dark.

▲ The product can be charged in all operating modes.

SWITCHES & FUNCTIONS

▲ The switch is on the front of the solar light.
(Please see Figure A for reference)

Sensor / Off / Auto

Sensor: please see Figure B for reference.

Off: In this mode the light will remain off.

Auto: In this mode the light will automatically come on at night. then turn off when the solar panel detects enough light to turn off.

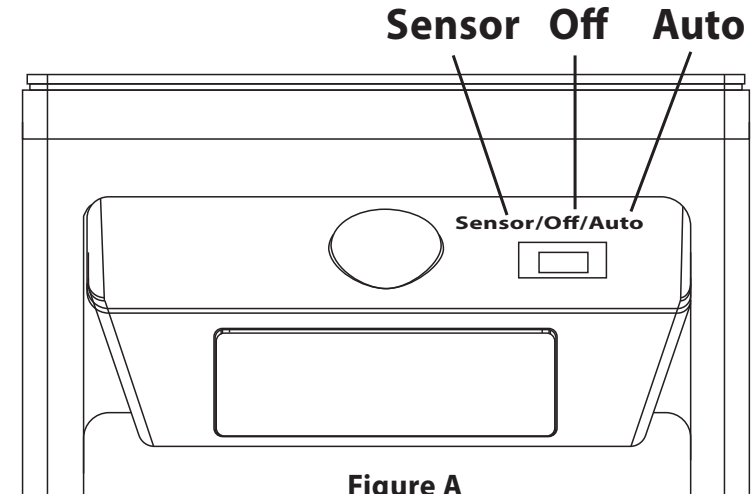

Figure A

Sensor Functions

When motion is detected, the light turns on at maximum brightness. When motion is no longer detected, the light will re-enter power saving mode after 30 seconds.

In ideal weather, the unit recharges within 7-8 hours.
The delay time for a bright light is 30 seconds when someone is nearby.
