Performance and Features

Experience pure and refreshing air instantly with Techko's high-quality atomizing humidifier. Engineered with corrosion-resistant materials and designed to accommodate a wide range of pH levels, it ensures long-lasting performance in various environments. Enhance any environment with color-changing LED lights for a delightful, atmospheric glow.

How to Operate

- * Hold the base of the humidifier steady and rotate the lid counterclockwise to remove for access to the water tank and filter.
- * Rotate the cotton core holder counterclockwise, remove and soak the inner cotton stick in water, return cotton stick back in holder and secure back to the upper lid.
- * Connect one end of the USB cable to the humidifier, and the other end to a power source with USB port (a computer, portable external battery, wall adapter). Once plugged in, the humidifier will enter standby status.
- * Fill the water tank with the appropriate amount of water and then secure the upper lid.
- * Use the button to start the humidifier. The button selection sequence is:

Button Press	Humidifier Mist	LED Light
1st	ON	Color Changing
2nd	ON	Red
3rd	ON	Green
4th	ON	Blue
5th	ON	OFF
6th	OFF	OFF

Humidifying mist will only begin when cotton stick has fully absorbed water. If the humidifier has been left unused for a long time and turned on, mist may not begin for about 3 minutes. This is NOT a malfunction, as the cotton stick is currently absorbing water. To speed up the process, you may remove and soak the cotton stick in water for 30 seconds before returning it back to the holder and turning on the humidifier. This will help the humidifier begin to generate mist quicker.

Product Specification

Name: Humidifier	Tank capacity: 135ML/4.5 Oz
Input: DC5V	Spray amount: 50-60 ML/h
Current:300-400MA	Continuous spray time: approx.3h
Rated Power: 2W	QualityInspection: Qualified product
Product weight:130 g	

Precautions and troubleshooting

- * Please use filtered or mineral water and not distilled water, as it may alter the humidifying effect.
- * Make sure the water container is only filled 90%
- * Be careful not to disrupt or deform the top spray nozzle as it may alter function
- * If there is no spray, or spray has lessened, make sure container is filled with water
- * If you notice an odor, please determine the water quality, change the water, and replace the cotton swab
