

SAFETY DATA SHEET

Biochar Blend for Indoor Plants

Section 1: Product and Company Identification

Product Name: Biochar Blend for Indoor Plants

Manufacturer: Wakefield BioChar
1826 Clay Road
Valdosta, GA 31601
(229) 278-2488

Emergency Phone: (229) 278-2488

Section 2: Composition/Information on Ingredients

Substance Name	Concentration	CAS Number
Biochar (Wood-Based Carbon)	24.4%	7440-44-0
Pine Bark Fines	35.0%	N/A
Plant-Based/Wood-Based Compost	30.0%	68439-86-1
Worm Castings	10.0%	N/A
CarbonBoost™*	0.6%	Proprietary Blend

*CarbonBoost™ includes:

Rhizophagus intraradices (135 propagules/qt): Mycorrhizal fungi to improve root colonization and nutrient uptake.

Bacillus amyloliquefaciens (18 million CFU/qt, CAS 68038-58-0): Probiotic bacteria for healthier plant growth.

Bacillus megaterium (18 million CFU/qt, CAS 68038-62-0): Probiotic bacteria to support soil and plant health.

Section 3: Hazard Identification

Classification	Category	Classification	Category
Flammable Wood	5	Skin Irritation	5
Aspiration Hazard	4	Eye Irritation	5
Carcinogenicity	5	Chronic Aquatic Toxicity	4
Specific Target Organ Toxicity (Single Exposure)			5

1/17/2025
Twm

Note: Category numbers indicate hazard severity, with 1 being most hazardous and 5 being least hazardous.

Section 4: First-Aid Measures

Effects of Overexposure. Exposure to biochar, compost, pine bark fines, and microbial dust may cause skin, eye, or respiratory irritation, as well as allergenic responses or asthma.

Medical Conditions Prone to Aggravation. Individuals with asthma, bronchitis, or allergies may need to avoid further exposure to carbon or microbial dust.

Inhalation. Remove to fresh air. If symptoms persist, such as wheezing or breathing difficulty, seek medical advice.

Eye Contact. Flush with water to remove dust particles. If irritation persists, seek medical attention.

Skin Contact. Wash thoroughly with soap and water. If rash or persistent irritation occurs, seek medical advice.

PPE Recommendations. Use a P100 respirator to protect against microbial spores. Wear gloves and eye protection to minimize contact with biochar dust.

Section 5: Fire-Fighting Measures

Flammability. Product is flammable near direct flame or at temperatures $>700^{\circ}\text{C}$. Auto-ignition temperature: $>700^{\circ}\text{C}$.

Unusual Fire and Explosion Hazards. Fine dust dispersed in air can create a potential dust explosion hazard. Minimum explosible concentration: 0.140 g/L.

Extinguishing Media. Water spray.

Fire-Fighting Equipment. Use full protective gear and SCBA with a full-face mask in positive pressure mode. Cool exposed containers with water and remove if safe to do so.

Section 6: Accidental Release Measures

Leak and Spill Procedures. Ensure area is well-ventilated. Use a vacuum with a HEPA filter or wet methods to avoid dispersing microbial dust into the air.

Cautions. Avoid creating dust. Biochar may smolder if exposed to heat over 550°C . Handle spills carefully to prevent airborne release of microbial spores or bacilli.

Section 7: Handling and Storage

Handling Procedures. Avoid dust release during handling.

Storage Requirements. Store below 80°C. Keep covered to limit dust. Avoid storing with oxidizing agents.

Section 8: Exposure Controls/Personal Protection

Gloves. Required to minimize skin contact with microbial components.

Respirator. Use a NIOSH/OSHA-approved particle respirator (P100) if dust levels are excessive.

Eye Protection. Wear safety glasses with side shields.

Ventilation. Utilize exhaust ventilation where possible.

Section 9: Physical and Chemical Properties

Physical State: Solid, particle size 0.1 – 2mm.

Appearance: Black carbonaceous material.

Odor: None.

pH: 8 – 9.

Boiling Point/Range: Not applicable.

Melting/Freezing Point: Not applicable.

Vapor Pressure: Not applicable.

Solubility: Insoluble in water

Section 10: Stability and Reactivity

Reactivity: Contact with strong oxidizers may result in fire.

Chemical Stability: Stable in closed containers at room temperature.

Conditions to Avoid: Incompatible materials, combustible materials.

Incompatible Materials: Strong oxidizers, sparks, heat, flame.

Hazardous Decomposition Products: Carbon oxides (CO, CO₂).

Section 11: Toxicological Information

Potential respiratory allergens may be present due to microbial components in CarbonBoost™, Wood Compost, and Worm Castings. Inhalation of microbial dust may cause allergic reactions or respiratory irritation in sensitive individuals. Fine particles from Biochar may also cause respiratory irritation if inhaled and could exacerbate existing conditions such as asthma or bronchitis. Prolonged exposure to high concentrations of organic or carbon dust may lead to discomfort or irritation of the respiratory tract. Direct skin contact may cause irritation in sensitive individuals due to microbial, organic, or carbon material present in the product.

Section 12: Ecological Information

CarbonBoost™ includes live microorganisms (bacilli and mycorrhizae) which may influence local soil microbiomes if released in large quantities. There are no known significant negative environmental impacts, but careful handling is recommended to prevent unintended microbial release.

Section 13: Disposal Considerations

Sweep or vacuum product. Incinerate or dispose of in accordance with all federal, state, and local regulations.

Section 14: Transport Information

Always ensure the load is covered to prevent dust loss. Wear proper PPE when tipping or unloading. Biochar is hygroscopic and can absorb liquids and gases.

Section 15: Regulatory Information

No additional information is available at this time.

Section 16: Other Information

This document was prepared on January 6, 2025. It includes references to OSHA guidelines, manufacturer information, and other trusted sources. The intended use for this product is as a soil amendment.

The information provided in this Safety Data Sheet is based on available data and believed to be accurate as of the creation date. However, no warranty, express or implied, is made regarding its accuracy, completeness, or suitability for any particular purpose. The user is responsible for ensuring compliance with applicable laws and regulations.
