

Cuddy® Crawler™ Wheel Kit

Take the Cuddy® from the car to the shore with ease! The kit features a stainless axle and all-terrain wheels for easier transport on hard surfaces like grass, dirt, and cement. Conveniently tows in packed sand as well, but just like anything else, soft sand is not ideal. Now follow along with our easy installation to unleash the full potential of your Cuddy®!

Set Includes:

2x Wheel Kits

4x Brackets

4x 15mm Bolts

1x Ball End Allen Wrench

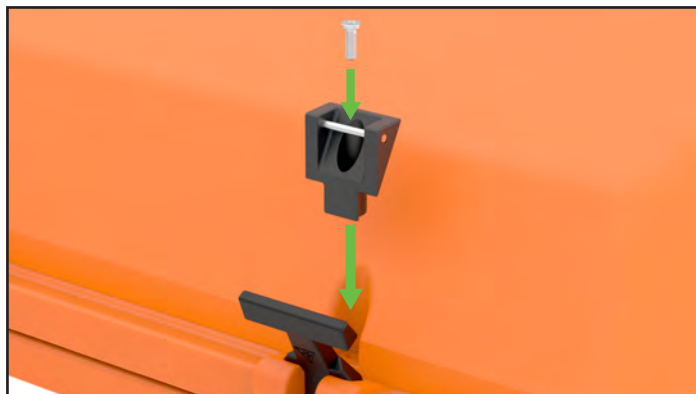

Clip on the tow strap included with your original Cuddy® for easy hand towing!

One-Time Bracket Installation:

Once installed, the Brackets can be left on permanently and will not affect the Cuddy® floating or towing function.

1. With your Cuddy® empty, flip it over and locate the bolts under the T-Latches and remove all 4 using the provided Allen Wrench.
2. Place the Brackets onto the Cuddy® as shown and tighten with the included longer 15mm bolts (do not reuse old bolts). **Slowly hand tighten with the included Allen Wrench until you feel the bolt stop. Do not overtighten .** Repeat for all 4 Brackets.

Attaching the Wheels:

Install in seconds (no tools required) for easy hand towing on hard surfaces like grass, dirt, cement, or packed sand.

1. Unfasten the straps on the Wheel Kit. Tilt the Cuddy® up and slide the wheel kit in underneath, so the nubs on the kit slide into the corresponding Cuddy® notches. Either orientation will work.
2. Feed the strap through the Bracket bar and fold it over to secure it. Repeat for all sides, then confirm the Wheel Kit is secure before use.

Towing Tip:

We recommend the wheels be removed when towing in water to reduce drag and prevent unintended dislodgement

Floating Tip:

The wheels do not have to be removed for stationary floating

Care Instructions:

Rinse the Wheel Kit after using in salt water

WARNING

Always follow all manufacturer warnings included with your Cuddy® or serious bodily injury or drowning may occur.

The Wheel Kit should only be used with a genuine GoSports® Outdoors Cuddy®. The Wheel Kit makes pulling your Cuddy® easy on land; however, the Wheel Kit does not have brakes and is entirely controlled by the user. The user assumes all risks in loading and towing the Cuddy®. Don't let your Cuddy® roll away or leave it unattended. Failure to control the Cuddy® can result in the Cuddy® becoming a projectile which can damage property and cause serious bodily injury or death. Also, never place goods, pets, or people on top of the Cuddy®, as doing so could result in serious bodily injury. Only hand tow your Cuddy® when using the Wheel Kit and maintain a slow speed. Fast towing and towing with a bicycle or another vehicle can cause damage to the vehicle and persons and is an unauthorized use. While we hope the Wheel Kit makes getting your Cuddy® down to the water easier, do so responsibly for the safety of yourself and others.
