Classic Bench Ends With Back And Armrest

Included:

x2
Bench Ends

Required: (not included)

Drill

x10
1.5" long deck screws

x5

Wooden 2x4s cut to your desired length.

Minimum length recommended is 2 feet.

Maximum length recommended is 6 feet.

1

Lay one of the bench ends on the ground. Insert a piece of wood into each slot. Make sure the wood is flush with the outer side of the bench end. If needed, use a rubber mallet to help insert the wood into the bench end.

2

Using a drill, pre-drill a hole on an angle, through the inside of the bench end and into each piece of wood. There are notches on the bench end to show where to pre-drill.

3

Using a drill and 1.5" long deck screws, drill one screw through each pre-drilled hole and into each piece of wood. **Do not overtighten.**

4

Place your second bench end on top and align the pieces of wood to go into the slots. If needed, use a rubber mallet to help insert the wood into the bench end.

5

Rotate your bench so that the bench end that is not yet screwed in is against the ground. Using a drill, pre-drill a hole on an angle, through the inside of the bench end and into each piece of wood. There are notches on the bench end to show where to pre-drill.

- 6** Using a drill and 1.5" long deck screws, drill one screw through each pre-drilled hole and into each piece of wood.
Do not overtighten.

7

Turn your new bench into an upright position and it is now assembled. Place the bench on a flat surface and enjoy!

Caution! Maximum capacity 580 lbs*

*Capacity may vary depending on the condition, type and age of wood used.
