

Instruction Manual

Model No: RB570

E314264

3MAL

A. Function Instruction

1. Input voltage: 120Vac/60Hz, Output: 18Vac, Max 40W

2. Protective device:

2.1 This product is equipped with built-in temperature protection (130°C thermo-fuse): When operating a transformer with instable input power, overload and other reasons may cause the internal temperature of the transformer to be over 130°C: Thermo-fuse will automatically cut off to stop transformer's operation if the transformer is overheated. (At this stage, transformer has been burnt out)

B. Installation

1. This product is for indoor use and must be covered so as to avoid exposure to water

2. Please install the connector of end product into the output socket of transformer.

3. Attention

3.1 Ambient temperature might damage this product if used long-term or out of intended scope.

3.2 Output cable should be minimum of 22 gauge (or larger).

3.3 Please use correct voltage for your products in accordance with nameplate information.

4. After you finish installation, please plug in electrical outlet for loading power for operating transformer.

IMPORTANT SAFETY INSTRUCTIONS:

When using electrical products, basic precautions should always be practiced including the following:

1. READ AND FOLLOW ALL SAFETY INSTRUCTIONS.

2. Read and follow all instructions that are on the product or provided with the product.

3. For a cord-connected or direct plug-in power unit, do not use an extension cord.

4. Reference the National Electrical Code, ANSI/NFPA 70, specifically for the installation of wiring and clearances from power and lighting conductors.

5. Installation work and electrical wiring must be done by qualified person(s) in accordance with all applicable codes and standards, including fire-rated construction.

6. For a cord-connected or direct plug-in power unit, do not install or use within 10 feet of a pool.

7. For a cord-connected or direct plug-in unit, do not use in a bathroom.

8. WARNING: Risk of Fire. Installation involves special wiring methods to run wiring through a building structure. Consult a qualified electrician.

9. Unit is designed to be mounted greater than 0.30 m (1 foot) from the ground surface:

WARNING: Risk of Electric Shock.

Mount the unit at a height greater than 1 foot from the ground surface.

10. This power unit is intended to be correctly orientated in a vertical or floor mount position.

SAVE THESE INSTRUCTIONS:

This manual contains important safety and operating instructions for power units.
