AUTO-DARKENING Welding Helmets

Discovery™ Series

A Great Value for the Occasional Welder

Our Discovery Series helmets are great for home, farm and hobbyists, offering fast reaction time, and 100% ultraviolet and infrared protection. View through the solar-charged LCD lens before welding — and it automatically darkens when an arc is detected by the two independent sensors.

Impact™ Series

For the Serious Fabricator at DIY Pricing

These helmets improve on the Discovery Series, offering a faster lens reaction time, larger viewing area, an expanded range of shades, and three independent sensors. This serious performance is complemented by premium, ultra-comfortable headgear, and wide range of graphics.

PRO Series

Professional Performance when You Demand the Best

Our most premium line of helmets offers an expanded viewing area — over 25% larger than the rest — with four sensors and the fastest lens reaction time. This line is designed to meet the performance and comfort needs of the professional welder.
