 OBSERVE ALL PRECAUTIONS AND
 FOLLOW DIRECTIONS CAREFULLY.**

Gordon's® Triple 10 Liquid Fertilizer 10-10-10 is a fertilizer solution made from N-P-K sources, which are essential macronutrients for plant, flower and root growth, promoting new seedling establishment and plant vigor. Made for use on lawns, pasture grasses, vegetables and flowers and ideal for use with all 12-Volt ATV & Tow-Behind sprayers.

Gordon's Triple 10 Liquid Fertilizer 10-10-10 is a component of a fertilizer program based on soil test recommendations. Use this product in conjunction with an additional fertilization program to provide turf at least 1 pound of nitrogen per 1,000 square feet each growing season. One gallon of product contains 1.05 lb of Nitrogen, 1.05 lb of Phosphate and 1.05 lb Potash. Check your state fertilizer regulations for maximum annual nitrogen rate and other state restrictions.

Where To Use:

For use in Lawns, Pastures, Vegetables and Flower Gardens.

Determining the Size of the Area to be Treated – Estimate the length and width of the area to be treated in feet. Multiply the length of the area by its width to determine the total square footage to be treated. Deduct any areas that will not be treated (house, shed, driveway etc.) and refer to the appropriate mixing chart for the use desired.

DO NOT APPLY NEAR WATER, STORM DRAINS, OR DRAINAGE DITCHES. DO NOT APPLY IF HEAVY RAIN IS EXPECTED. APPLY THIS PRODUCT ONLY TO YOUR LAWN/GARDEN.

Mixing Instructions

- Step 1: Add 1/2 to 2/3 of the required amount of water to the sprayer.
 Step 2: Add Gordon's Triple 10 Liquid Fertilizer 10-10-10 mixing the solution thoroughly.
 Step 3: Slowly add in herbicide with agitation. (Skip if not adding herbicide)
 Step 4: Add balance of water with agitation.
 Step 5: Apply spray solution uniformly.

When tank mixing herbicides follow directions on the herbicide label. Always make sure that you use a jar test for compatibility before mixing chemicals in your tank.

Mixing Chart for Lawn and Pasture Applications:			
	To make 6 gal of finished spray	To make 12 gal of finished spray	To make 15 gal of finished spray
Amount of product to add to tank	1 gal	2 gal	2.5 gal
Amount of water to add to tank	5 gal	10 gal	12.5 gal
Coverage Area	6,000 sq.ft.	12,000 sq.ft.	15,000 sq.ft.

Application Schedule for Starting or Repairing Lawn

When attempting to establish or repair turf, the following application schedule may be used:

Number of Applications	When to Apply
3	Apply weekly for up to three weeks after installing lawn

Gordon's Triple 10 Liquid Fertilizer 10-10-10 provides essential macronutrients needed for seedling establishment. To ensure these nutrients are available to young roots apply Gordon's Triple 10 Liquid Fertilizer 10-10-10 once weekly for the first three weeks following the installation of a new lawn.

Application Schedule for Established Lawns and Pastures¹

For cool season grasses, the following guide may be used for the application schedule:

Number of Applications ²	When to Apply
2	March-April/early September
3	March-April/September/October
4	March-April/September/October/November

²Florida – Use only the low rate. Do not make more than 2 applications per year.

For warm season grasses, the following guide may be used for the application schedule:

Number of Applications ²	When to Apply
2	June/August
3	June/July/August
4	May/June/July/August

²Florida – Use only the low rate. Do not make more than 2 applications per year.

¹In some states this product may only be used as a starter fertilizer – see state restrictions below.

For Vegetables and Flower Garden Applications:

Apply 3.35 oz of product in 10 gallons of water to cover 100 sq.ft. Apply at planting and every 7 to 14 days thereafter as desired.

State Restrictions:

Check your state fertilizer regulations for maximum annual nitrogen rate and other state restrictions.

Maryland: This fertilizer contains phosphorus and may not be used on turf in the state of Maryland except when 1) Providing nutrients to specific soils and target vegetation as determined to be necessary in accordance with a soil test that was conducted by a laboratory identified under § 8-803.7 of the Agriculture Article, Annotated Code of Maryland, performed no more than 3 years before the application; 2) Establishing vegetation for the first time, such as after land disturbance, provided the application is conducted in accordance with the recommended application rates established by the State; or 3) Reestablishing or repairing a turf area.

New Jersey: In the state of New Jersey, this product may be used only when 1) Providing nutrients to specific soils and target vegetation as determined to be necessary pursuant to a soil test conducted by a laboratory identified pursuant to subsection b. of section 6 of P.L.2010, c.112 (C.58:10A-66) and performed no more than three years before the application, and pursuant to the associated annual fertilizer recommendation issued by the New Jersey Agricultural Experiment Station at Rutgers, the State University; 2) Establishing vegetation for the first time, such as after land disturbance, provided the application is in accordance with the standards and requirements established under the "Soil Erosion and Sediment Control Act," P.L.1975, c.251 (C.4:24-39 et seq.) and the rules and regulations adopted pursuant thereto; 3) Reestablishing or repairing a turf area; or 4) Delivering liquid or granular fertilizer under the soil surface, directly to the feeder roots.

New Hampshire: In the state of New Hampshire, this product may only be used on 1) Establishing new lawns, for repairing a lawn, for seeding, or for use when a soil test indicates a phosphorus deficiency.

Virginia: In the state of Virginia, this product may be used only on 1) Newly established turf areas from sod or seed during the first growing season; 2) Turf areas being repaired or renovated; and 3) Turf areas where soil tests performed within the past three years indicate nutrient deficiency.
