

Shoreklear-Plus®

Aquatic Herbicide

**Applied
Biochemists®**

Surface intended, non-selective herbicide blended with a surfactant

Shoreklear-Plus® Aquatic Herbicide is a non-selective herbicide which effectively controls many herbaceous and woody plants. A non-ionic surfactant is mixed in with this product. (This product will not control plants that are completely submerged or have a majority of foliage under water.)

Advantages

- Systemic herbicide for down-to-the-root kill
- Ready-to-use, included surfactant
- Fast acting on annual roots

Application

Apply by hand-held and high-volume Spray Equipment, Ground Equipment, Controlled Droplet Applicator (CDA), Wiper applicators/sponge bars, Rope/Sponge wick applicators or by Porous-Plastic Applicators.

Restrictions & Regulatory Information

This product will not control plants that are completely submerged have a majority of foliage under water. No restrictions on irrigation, swimming or animals drinking treated water. Do not apply this product directly to water within 1/2 mile up-stream of active potable water in-take of flowing water, or within 1/2 mile of active potable water intake in a standing body of water. The intake must be turned off for 48 hours or tested below state requirements.

Specifications

Active Ingredient(s)	18.0% Glyphosate
Appearance	Clear water-like solution
Dosing	General spray solution: 3.5 fl.oz. to 9.00 fl.oz. solution 3.3 gallons of product per surface acre in any single broadcast treatment over water
