INSTALLING WINCH TO WINCH MOUNT

1. The Winch is not included and can be purchased from Retailers. The Roller Fairlead, Swisher part number 8003, is not included in this kit. We have made every attempt to provide the proper mounting holes to cover all of the popular winch models.
2. Install the Winch to the manufactures specifications.
3. Install the Roller Fairlead to the mount with the bolts coming from the back. This gives the maximum amount of room for the winch.
4. After the Winch and Roller Fairlead have been mounted and tightened securely, install the mount into the receiver to the rearward most position and secure with Bent Pin # NB702. The rearward position effects the angle and position of the cable on the accessory.
