WINTER

POWER EQUIPMENT

WE LOVE TO HELP BECAUSE WE LOVE TO WORK.

In 1938, Charles E. Schmidt founded Tractor Supply Company to provide hardworking folks a trusted source for what they need to work their land.

A year later, we opened our first store in Minot, North Dakota. Back then our focus was a mail order business supplying tractor parts to family farmers in America's heartland. But over the years, we have evolved.

As another calendar year is coming to a close and snow season is drawing near, we are more committed than ever to fulfilling the needs of those who are serious about taking care of their property. Whether you are clearing your driveway or salting your neighbor's sidewalks, we have a full line of snow products for life out here.

WE'VE GOT YOU COVERED

WE ARE HERE TO HELP

At Tractor Supply, we know your job is more than Monday through Friday 9 to 5. We strive to bring you quality products at great values each and every day.

Our team members are here to offer advice, lend a hand, and provide friendly service because our number-one job is getting to know you and meeting your needs. We want to ask the right questions to provide you with the best solutions.

We might ask about your driveway size, if you have sidewalks or steps, previous experience or any special requirements.

Rest assured, we only carry brands we believe in. If our products don't meet our high expectations, they could never meet yours. We look forward to getting to know you and becoming a partner in your success.

TRACTORSUPPLY.COM — YOUR ONE-STOP SHOP FOR ALL YOUR OUTDOOR NEEDS

Go to TractorSupply.com to browse our selection of snow throwers.

Can't decide what product is right for the job? See what other customers are saying about the products that interest you the most in our ratings and reviews. Or write a review to share your experience and expertise with other consumers like you. Go to TractorSupply.com/Reviews to find out more.

TractorSupply.com/KnowHowCentral also has how-to information on everything from engine maintenance to calendars for fall/winter lawn care. It has everything you need for life out here.

SINGLE-STAGE VS. TWO-STAGE

HOW TO CHOOSE A SNOW THROWER

When choosing a snow thrower you have two options: single-stage and two-stage.

SINGLE-STAGE CLEARING SYSTEM

Single-stage snow throwers require smooth surfaces for operation. The adjustable and reversible scraper is set so the auger contacts the ground when the bail is engaged and the handle is slightly elevated. The snow is drawn into the snow thrower, channeled through

the auger housing, and discharged through the clog-resistant polymer chute at the same time the unit is being propelled forward. These are ideal for small driveways, sidewalks and steps.

TWO-STAGE CLEARING SYSTEM

Two-stage snow throwers are heavier and clear a wider path. They have a slow-turning metal auger that draws in the snow, which is then pulled up by a high-speed impeller and propelled out of the chute. The auger on a two-stage snow thrower doesn't touch the ground so it can be used on gravel when the skid shoes are fully lowered. Two-stage snow throwers are ideal for heavy snowfalls, and they are self-propelled so they are easier to move.

SINGLE-STAGE VS. TWO-STAGE

AREA	SINGLE-STAGE	TWO-STAGE
Steps/Sidewalks		
Up to 39' Driveways		
Over 40' Driveways		
SURFACE		
Smooth/Flat		
Gravel/Rough		
Incline		
SNOWFALL		
Under 6" per snowfall		
Over 6" per snowfall		

WHY OHV ENGINES?

ALL SNOW THROWERS AT TRACTOR SUPPLY COMPANY HAVE OHV ENGINES

POWERMORE® ENGINE

- OHV design for more efficient operation
- Easy starting and operation
- Variable-speed throttle (two-stage models)
- Heavy-duty crankshaft and ball bearings
- Easy-care design backed by a full service network
- 2-year limited warranty†

CUB CADET® ENGINE

- OHV design with cross-flow cylinder head
- Durable cast-iron camshaft and cylinder sleeve
- Forged steel crankshaft
- Heavy-duty crankshaft and ball bearings
- 3-year limited warranty†

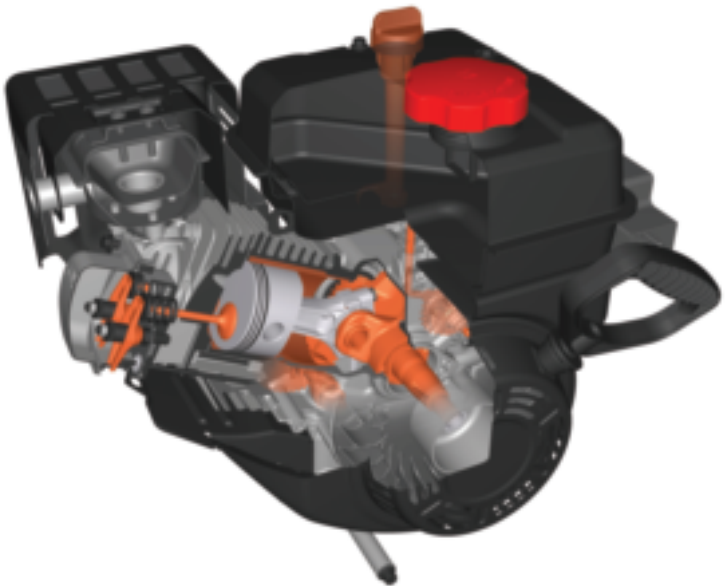

†See Owner's Manual for warranty information.

OVERHEAD VALVE DESIGN

The more efficient, cleaner-burning engine produces more power and reduces fuel consumption compared to conventional side-valve engines. The design of the overhead valve (OHV) creates greater airflow through the engine. The combustion chamber produces an even fuel burn for increased efficiency and fewer exhaust emissions. The cross-flow head design lends itself to cooler running temperatures thereby extending the life of the engine.

OHV ENGINE BENEFITS

- Cleaner burning
- Increased power
- Reduced fuel consumption
- Easy to start
- More efficient
- Quieter

SINGLE-STAGE SNOW THROWERS

**PERFECT FOR
LIGHT TO MODERATE
SNOWFALLS**

21" CLEARING WIDTH

Perfect for lighter work like small driveways, sidewalks and steps (Featured on all single-stage snow throwers).

DESCRIPTION	21" SINGLE-STAGE SNOW THROWER
Engine Type	123cc OHV
Engine Manufacturer	POWERMORE®
Clearing Width	21"
Intake Height	13"
Auger Size	9"
Impeller Size	N/A
Starter	Recoil
Chute/Pitch Control	Clog-resistant Polymer Chute/Manual Pitch Control
Drive System	Auger-Assist
Special Features	Folding Handle
Tires	7" x 1.5"
Warranty†	2-year limited residential
SKU #	1022671
REPLACEMENT PARTS	
Auger Belt	4442092
Drive Belt	N/A
Shear Pins	N/A
Skid Shoes	N/A

Some items available by special order. Models may vary by store. † See owners manual for warranty information.

POWERFUL ENGINE OPTIONS

More power than you might expect from a single-stage snow thrower (Featured on all single-stage snow throwers).

REMOTE CHUTE CONTROL

Throw snow in the direction you want with chute control from the operator's station (221 LHP only).

SNOW THROWER ATTACHMENTS AND ACCESSORIES

DELUXE SNOW THROWER SNOW CAB

Heavy-duty vinyl construction keeps you comfortable during tough winter storms.
SKU #4457607

DRIFT CUTTER KIT

Effortlessly power through deep snow drifts.
SKU #4406216

Some items available by special order. Models may vary by store.

CARE AND MAINTENANCE

MAINTENANCE AND LUBRICATION CHECKLIST	First 5 Hours	Each Use or Every 5 Hours	Every Season or 25 Hours	Every Season or 50 Hours	Beginning Each Season	Before Storage
Check engine oil		•				
Change engine oil	•			•		
Check spark plug			•			
Clean exhaust area		•				
Lubricate wheel axle					•	
Lubricate wheel bearings					•	
Lubricate chains, bearings, shafts and shifting mechanism					•	•
Check wear on friction wheel rubber					•	•
Check air pressure in tires					•	
Fresh fuel		•				•

**Please refer to Operator's Manual for complete maintenance and safety information.*

UNIVERSAL POLYMER SKID SHOE KIT

Rugged polymer material won't rust or mar your driveway.
SKU #4458611

SNOW THROWER SKID SHOES

Allows your snow thrower to glide over driveways with ease.
SKU #4406127

IMPORTANT FUEL TIP*

Do not use blends of fuel containing more than 10% ethanol E10.

These blends will lead to poor engine performance, damage to internal components, potential safety hazards, and may void the engine warranty.

Avoid using stale gas.

Always use a fuel stabilizer in fuel storage container to keep fuel fresh. The use of a fuel stabilizer reduces the need to drain fuel during storage, decreases corrosion and moisture, and keeps fuel fresh for up to 12 months.

PREPPING YOUR RIDING MOWER FOR WINTER

Using your rider this winter for snow removal? Follow these steps:

- Change engine oil and replace oil filter, if equipped
- Clean or replace air filter
- Clean engine cooling fins
- Check spark plug condition and gap
- Clean battery terminals
- Clean debris from hood and louvers
- Lube front axles and rims
- Lube all deck wheels
- Lube deck spindles
- Lube pedal pivot points
- Treat fuel with stabilizer to prevent deterioration

Not using your rider this winter? Follow all of the steps to the left plus the following:

- Fuel system must be completely emptied, **OR** the fuel must be treated with a stabilizer to prevent deterioration.
- Remove the battery and store in a cool, dry place. Do not let battery freeze.

Please refer to product and engine manuals for maintenance instructions.
