

- Cleans, softens and preserves color and texture of leather in one step.
- Removes embedded dirt and grime, and dries to a long-lasting shine.
- Won't dull, stain or leave a greasy residue.
- Use after every ride.

STEP 1: Use Leather New® Foam or Leather New® Saddle Soap after every ride.

STEP 2: Use Leather New® Deep Conditioner & Restorer to restore softness and pliability or as needed.

DIRECTIONS FOR USE

First remove all dust and dirt from the leather with a soft brush or vacuum. Then spray Leather New® Easy-Polishing Glycerine Saddle Soap directly onto the leather. NOTE: Do not allow Leather New® saddle soap to run. Use a soft, dry cloth to rub the liquid well into the leather. Be sure to use a cloth with enough nap to reach down into stitches and carving. Rub thoroughly until foam disappears, then polish with a clean, dry cloth. Also use Leather New® saddle soap on wet leather to prevent stiffening. Use on stiff leather to soften and prevent cracking.

CAUTION

Keep this and other soap products out of children's reach. Do not use Leather New® Easy-Polishing Glycerine Saddle Soap on suede, rough-out or very light shades of leather. Do not use on leather clothing or leather furniture. If you are unsure whether Leather New® saddle soap can be used on your leather, simply test an area that cannot be seen. It may darken some leathers. The liability of Farnam companies, Inc. shall not exceed the purchase price of this product.
