VETS PLUS, Inc.
Global Animal Health

probios®

...the world leader in probiotics

Why use Probios® brand?

Probios is the world's most widely used, researched, and recognized brand of direct-fed microbials (DFMs).

Science-Based Research:

More than 95 individual studies have been performed at universities and under practical field conditions. These trials, involving 30,000 animals, have shown positive results for Probios microbial products in dairy, beef, swine, and sheep. Additional studies have shown positive results for Probios in horses and in starter, grower, and finisher pigs, chickens, and turkeys.

Backed by Quality:

Probios is safe and effective when fed to animals. Probios contains guaranteed levels of *Enterococcus faecium*, *Lactobacillus acidophilus*, *Lactobacillus casei*, and *Lactobacillus plantarum*.

Stability and Viability:

Probios contains bacteria of proven efficacy in numbers capable of remaining viable during manufacturing and storage. Additionally, every guaranteed bacterium (expressed in CFUs or Colony Forming Units) will be available to the animal upon use.

Manufactured in the U.S.A.

Vets Plus, Inc. is the exclusive manufacturer of Probios microbial products in the U.S. These products are manufactured in an SQF Level 3 Edition 7.2 certified facility.

For questions about Probios, call 715.231.1234.

Probios® and Probiocin® are registered trademarks of Chr. Hansen, Inc.
Manufactured and marketed by Vets Plus, Inc.®, under license from Chr. Hansen.
Intelliflora® is a registered trademark of Vets Plus, Inc.®

When to use Probios:

When animals are under stress, they may experience digestive upsets and reduced appetite. DFMs may help maintain normal appetite and digestion when given to animals during the following situations:

- Change in Environment
- Birthing (Freshening)
- Traveling
- Kenneling
- Vet Visits
- Hospitalization
- Intensive Training
- Change in Feed or Diet

Probios may be used daily for animals such as:

- Horses
- Dogs
- Cats
- Other Exotic Pets
- Dairy/Beef Cattle
- Calves
- Swine
- Goats
- Sheep
- Chickens

The ABCs of DFMs

(Direct-fed microbials)

What are DFMs?

Direct-fed microbials are also known as probiotics. The word “probiotic” literally means “for life” and is the opposite of the word antibiotic. Probiotics are good bacteria that can help boost the levels of beneficial bacteria in the gut, whereas antibiotics attack and kill infections and unwanted bacteria. For animals, probiotics are more commonly referred to as direct-fed microbials, or DFMs.

DFMs support overall health:

DFMs help maintain intestinal balance, overall health and performance by:

- Helping maintain natural immunities
- Helping maintain pH in the gut
- Helping maintain nutrient absorption
- Helping maintain gut microflora balance

Billions of bacteria:

Every animal with a digestive system, including humans, has bacteria in their digestive system. Without bacteria an animal could not digest food. Animals have an extremely complex collection of about 100 trillion micro-organisms in their entire digestive tract. The intestine of animals contains billions of bacteria, some of which are beneficial (good bacteria) and some of which are pathogenic (bad bacteria).

The importance of good bacterial balance:

Under certain conditions, such as stress, the natural balance of beneficial bacteria in the digestive system is disrupted. The number of pathogens increases while the number of beneficial organisms decreases, causing digestive upsets including diarrhea, constipation, and discomfort. In animals, DFMs may help restore the normal microbial balance in the gut and overall health of the animal.

Use of DFMs at birth:

Newborn animals do not have bacteria in their intestine. The intestine rapidly becomes colonized by natural means from the mother and the environment. Studies have shown providing DFMs to an animal at birth plays an important role in the growth and health of animals.

Available Sizes:

CHR-980: 120 g jar, 6 per case

CHR-985: 240 g jar, 6 per case

Suggested Use:

Probios Soft Chews feature a highly palatable chicken liver flavor that makes administering them to your dog a breeze. Each soft chew provides two strains of live (viable) bacteria that help support proper digestion. These provide the ideal supplement for your pet's stomach caused by situations like travel or visits to the vet.

Feeding Recommendations:

120 g jar: 2 chews per 10 lbs of body weight

240 g jar: 1-3 chews per 50 lbs of body weight

Probios® Digestive Tablets

Dog

Available Sizes:

CHR-910: 45 ct jar, 6 per case

CHR-911: 180 ct jar, 6 per case

Suggested Use:

Probios Digestive Dog Tablets are a chewable, probiotic supplement that contain a source of live, naturally occurring micro-organisms to help support proper digestion during diet changes, kenneling and travel.

Feeding Recommendations:

Puppies: 1 tablet per day

Dogs: 1 tablet per 20 lbs body weight per day

Probios® Chewables for Dogs

Digestion Support

Available Sizes:

CHR-950/6: 1 lb pouch, 6 per case

Suggested Use:

Probios Digestion Support Treats for Dogs are suggested for daily use to maintain a healthy digestive system. Also suggested for use during traveling, kenneling, or training to help support proper digestion.

Feeding Recommendations:

Give 3-6 treats daily. Repeat as needed.

Probios® Chewables for Dogs

Joint Support

Dog

Available Sizes:

CHR-951/6: 1 lb pouch, 6 per case

Suggested Use:

Probios Joint Support Treats are suggested to deliver probiotic benefits and help support healthy joint function. For use in all breeds of dogs.

Feeding Recommendations:

Give 3-6 treats daily. Repeat as needed.

Probios® Dispersible Powder

Available Sizes:

CHR-404: 240 g jar, 12 per case

CHR-403: 5 lb jar, 6 per case

CHR-402: 25 lb pail, 1 per case

Suggested Use:

This unique product helps support proper digestion. The supplement provides more than 10 million colony forming units of four different strains of lactic acid bacteria that work to naturally facilitate digestion.

Feeding Recommendations:

Dogs: (under 1 lb): 1/4 tsp / pet / day

Dogs: (1 to 10 lbs): 1/2 tsp / pet / day

Dogs: (>10 lbs): 1 tsp / pet / day

Probios® Pro-Pill Pods™

Dog

Available Sizes:

CHR-991: (3.7 oz) 30 ct jar, 12 per case (Chicken)

CHR-992: (7.4 oz) 30 ct jar, 12 per case (Chicken)

CHR-996: (3.7 oz) 30 ct jar, 12 per case (Peanut Butter)

CHR-997: (7.4 oz) 30 ct jar, 12 per case (Peanut Butter)

Suggested Use:

Highly palatable Pro-Pill Pods take the hassle out of medicating your dogs by concealing medicinal odors and taste. Ideal size that fits most tablets and capsules. May be cut in half for smaller pills.

Directions for Use:

Hold the pod with thumb and forefinger. Insert pill.

Squeeze ends shut. Pro-Pill Pod is now ready to offer to your pet.

Provide fresh water at all times.

Dog

Probios® Intelliflora® for Dogs

Available Sizes:

CHR-800: 1 g packets (30 ct), 6 per case, 24 per master case

Suggested Use:

Probios Intelliflora is designed to be used as a daily supplement to help support normal digestion.

Feeding Recommendations:

Sprinkle one packet daily on top of your pet's food.

Probiocin® Pet Gel

Dog

Available Sizes:

CHR-900: 15 cc tube, 72 per case

Suggested Use:

Probiocin is a probiotic supplement that helps maintain a healthy digestive system by supporting the proper bacterial balance in the lower intestine.

Feeding Recommendations:

Newborns: 1 g at birth

Dog

Probios® Dental Sticks

Available Sizes:

CHR-970: 8.11 oz pouch, 12 per case

Suggested Use:

Helps reduce plaque and tartar as your dog chews.
Prebiotics and probiotics help support proper digestion.

Feeding Recommendations:

Small Dogs (5-25 lbs): 1/2 chew, twice daily

Medium and Large Dogs (20-60+ lbs): 1 chew, twice daily
