STOP!

PLEASE READ THE INSTRUCTIONS AND IMPORTANT INFORMATION BELOW BEFORE USING YOUR INVICTUS™ PRO.

USING YOUR INVICTUS PRO WITH A 10 SPRAY NOZZLE (INCLUDED)

Before using your Invictus Pro, make sure the rubber washer is firmly set inside the female coupling. This will prevent leaking.

1. Attach the female end of the Invictus to the water source.

2. Attach a Spray nozzle (included) to the male end of the Invictus Pro hose by twisting it clockwise.

3. Turn on the water to use the hose by lifting the locking lever. **NOTE: Locking lever might be tight at first. It will gradually loosen over time.**

10 SPRAY SETTINGS

4. Control the water flow by turning the dial of the nozzle to select the desired water setting. Turn clockwise or counterclockwise to adjust the flow of water.

5. When you are finished using the Invictus Pro, make sure to turn the water OFF at the source spigot.

6. Allow the water in the Invictus Pro to drain. If you are using a nozzle then lift the locking lever to open the nozzle.

USING YOUR INVICTUS PRO WITH A SPRINKLER

1. Attach your sprinkler to the male end of the Invictus Pro.
2. Place your sprinkler in the desired place in your yard or garden.
3. For each use, slowly open the water valve to regulate water pressure gradually in the hose. Your sprinkler will work the same way it works with any ordinary hose.

IMPORTANT INFORMATION: This hose is intended for routine watering applications.

- Do not run hot water through this hose.
- Do not leave the water turned ON with the Invictus Pro under pressure when not in use.
- Drain your hose in the summer when you are not using it.
