

BILLY-BOB® MULTI-CATCH MOUSE TRAP

Remove the bait tray from the bottom.

Fill the bait tray with food and ice cubes for water - Ice cubes won't spill when moving the trap.

Mice will crawl up the metal mesh and drop into the trap to get to the food. Once inside, the patented green sleeve at the top keeps them from climbing out.

customer submitted photo

Designed to catch and remove large numbers of mice. Use in locations that have a mouse problem! Bait the trap with lots of food and put 2 ice cubes in the water tray. Leave caught mice inside the trap for several days. Because they have food and water they will be fine. **Mice inside the trap will attract MORE mice into the trap!**

Be patient, it usually takes several days to start catching mice. Once the first mouse goes in, his friends will get really jealous and want to join the party!!

*** TIPS - Fill the bait tray full of food and put 2 ice cubes in the water tray. Old sandwiches and bird seed work great. Smear some peanut butter on the wire mesh, this will help entice the mice into climbing up the side. Place the trap in dark secluded areas where you have an abundance of mice.**

CHEW TIPS:

Mice tend to chew on the plastic parts inside the trap if they run out of food. Always keep the trap on a flat surface.
