USER MANUAL

PET CAR SEAT USER MANUAL

Thank you for choosing NOAH & PAW!
Follow these instructions to set up the seat for your pet’s safety and comfort.

1 Unpacking

- A Unpack all items from the box and remove all packaging.
- B Verify that you have the correct contents:

2 Assembly

- A Insert the seat pillow:

Take the largest pillow and insert it into the **Seat Pillow Cover**. Make sure the pillow is fully inside, then zip it closed.
- B Insert the wall pillows:

Use the next four pillows for the walls. The **two larger pillows** go into the two large wall sections, while the **two shorter pillows** go into the **two shorter wall sections**.

PET CAR SEAT USER MANUAL

TIP:

As you insert each pillow, gently pull the zipper using two fingers, keeping them between the zipper track and pillow to ensure smooth closure.

C Zip the corners

Secure all four corners by zipping them up carefully.

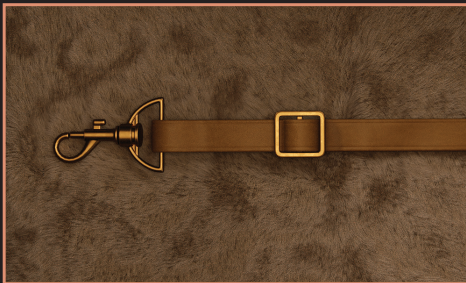

D Place the seat pillow

Place the main pillow inside the middle of the seat, and massage it around on all sides so it spreads evenly

3 Secure Your Pet with the Harness Strap

Don't forget to use the harness strap: For your pet's safety, always attach the harness strap to your pet's harness before you start driving. This strap keeps your pet secure, preventing unnecessary movement and ensuring a safe journey.

4 Allow 72 Hours for Full Expansion

Allow 72 Hours for Full Expansion: The pillows may appear slightly compressed initially. This is normal, as we compress them to minimize environmental impact. Allow up to 72 hours for the pillows to fully rebound and reach their intended shape.
