is the  
new tough.

**abc** 

## Balance. Performance. Precision.

The electrostatic charge between our micro glass beads and the rubber keeps the beads in place, counteracting vibrations and ensuring a fully balanced axle end (tire, wheel, and wheel assembly components) at all speeds for the life of the tire.

- ABC beads can be installed through the valve stem
- Eliminates need of tire balancing machines
- Reusable and environmentally friendly

### Balancing more than just trucks

Whether it's a commercial vehicle, Off-Road, Motorcycle, or Antique car, ABC Balancing Beads has the right solution for you. ABC's easy-to-use drop-in bag saves time and money on new tire installations as well as the added benefit of installing our beads through the valve stem without having to remove the tire and wheel from the vehicle.

### Saves you time and money with many benefits

- Improved fuel economy
- Extended tire life
- Even tread-wear
- Cooler running tire temperatures
- Balanced for the life of the tire
