Care and Maintenance

CLEANING

Painted and Plastic Surface

Wash with mild detergent or non-abrasive cleaner and warm Water.

Stainless Steel Surface

Wash with mild detergent and warm soapy water or use stainless steel cleaner. Wipe dry with a soft cloth after each use.

Wash only in the direction of the stainless brushed finish to avoid damage.

Stainless steel can rust under certain conditions. This can be caused by acidic marinades, chlorine, saltwater, exposure to coastal climates, other natural elements, or improper cleaning tools such as wire or steel wool.

When assembling, partially thread one screw into its corresponding position on one side, securing it temporarily (be careful not to fully tighten).

Proceed to do the same for the other locations following a similar approach until all screws for this step are correctly aligned with their threads.

Once this step is completed, proceed to fully tighten all screws. If you encounter misalignment with any screws, gently apply manual pressure to slightly adjust the hole to align it with the desired position before threading the screw into the thread. Once the screw is in place, release the pressure.

Following these steps will allow you to continue with the tightening process
