UNBEATABLE VALUE FOR LONG-LASTING POWER

The FLEX-M2 Solar Bundle delivers unbeatable value by combining cellular connectivity with year-long power—each camera runs continuously for up to 12 months with a LIT-22 rechargeable battery or up to six months with AA batteries. Built tough and easy to install with adjustable mounting options, it's the ideal setup for reliable scouting that lets you leave your hunting area undisturbed.

KEY FEATURES

BUILT TOUGH: get superior durability and reliable performance with the FLEX-M2's compact design, enhanced latch mechanism, and weather resistance that holds up even in harsh conditions.

LONG-LASTING POWER: The FLEX-M2 and SPLB-10 compact solar panel can run more than 12 months at a time when used together with a LIT-22 rechargeable lithium battery pack, or up to 12 months at a time with standard AA batteries. This greatly reduces the need for field visits and the risk of alerting nearby wildlife.

LET SPYPOINT SCOUT FOR YOU: receive photos and videos with sound, and request full-HD photo and video files, via the free SPYPOINT app—keeping you updated on game activity from anywhere.

ADJUSTABLE MOUNTING: use the included mounting arm to optimize your solar panel or camera placement, featuring 360° rotation and adjustable tilt.

FREE TRANSMISSION PLAN: get 100 free photos a month per camera, with plan upgrades that are among the most affordable in the market. Plus, join the SPYPOINT Insiders Club to increase each of your cameras to 250 photos per month and gain access to many advanced scouting features.

CROSS-CARRIER COVERAGE: Dual-SIM technology automatically connects you to all major carriers and the strongest signal in the area, so you can count on reliable coverage.

EASY SET UP AND REMOTE MANAGEMENT: leave your hunting area undisturbed by activating, managing, and updating your camera remotely via over-the-air updates with the SPYPOINT app. Plus, locate your camera anytime using the GPS locator on the in-app map.

ENDLESS OPTIONS: fine-tune your camera settings with customizable features like Multishot mode, Time-Lapse and Time-Lapse+, scheduling, in-app maps, and more. Download your HD photos and videos easily from the app or the microSD card, ensuring everything stays backed up.

FILTER FOR WHAT MATTERS TO YOU MOST: use free BUCK TRACKER™ AI to automatically filter photos and videos.

TWO-YEAR WARRANTY: enjoy peace of mind knowing that SPYPOINT's "Know You're Covered" guarantee protects your investment.
