TRAILER BOARDING STEP

This heavy-duty plastic boarding step is built to make climbing on and off your trailer safer, faster, and more convenient. Its durable, weather-resistant construction stands up to repeated use in marine environments, while the flow-thru tread design helps channel water away to reduce slipping. The wide step surface offers stable footing, even in wet or muddy conditions, giving boaters a reliable way to access the bow or trailer tongue during loading, unloading, or maintenance. Simple to mount and lightweight to handle, this step delivers long-lasting performance without adding unnecessary weight to your trailer setup.

Key Features

- Heavy-duty plastic construction built for long-term outdoor use
- Flow-thru tread design for slip resistance and effective drainage
- Wide, stable step surface for safer footing in wet conditions
- Ideal for mounting near the bow or trailer tongue
- Lightweight, durable design that's easy to install
- Helps improve access during launching, loading, cleaning, and inspections
