# HÖVELER - A STORY WITH A FUTURE

We see it as our duty to be at the forefront of progress with perseverance and innovation, without forgetting our own tradition. Today, Höveler is one of the leading horse feed manufacturers in Europe and its expertise and quality are recognised worldwide.

This means that our experience is your security - experience that you can buy. Experience that many top stud farms, breeding centres, competition and racing stables and, since 2003, the German Olympic Committee for Equestrian Sports (DOKR) rely on.

Highly trained specialist advisors support you, providing practical information on the targeted use of feed and a wide range of tips on general horse feeding.

Contact us if you have any questions about targeted nutrition. Because the well-being of your horses is our motivation.

**WZ 100 725**, it all started with this number.

It is the registration number of the Imperial Patent Office in Berlin for Arnold Höveler's invention in 1905.

With the product 'Reformhafer', Arnold Höveler broke through the conservative hay and oat feeding trend with the first patented horse feed in muesli form - the archetypal muesli, so to speak. The founder's philosophy of always developing his horse feed programme according to the latest scientific findings on the nutritional requirements of horses has been consistently maintained over the past 100 years and has been further developed by today's feeding experts.

We owe the foundation of our company in 1905 and its successful development to this.

## Original EF PferdeMüsli

Energetically and dietetically valuable muesli without oats.

Höveler Original EF PferdeMüsli is a wholesome alternative to supplementary feed that contains oats. It mainly consists of highly solubilised cereal flakes whose starch is quickly and completely digested by the horse in the small intestine.

This means that the risk of digestive sensitivities, a common consequence of carbohydrate transfer to the large intestine, can be significantly reduced by feeding Original EF PferdeMüsli.

The alfalfa content supplements the supply base with carotene, vitamin E and B vitamins. Original EF PferdeMüsli is rounded off with important trace elements such as manganese, zinc, copper and selenium.

The selected molasses content makes Original EF PferdeMüsli a low-dust muesli for horses and at the same time ensures that the highly digestible muesli also tastes delicious!

- OAT-FREE

## Original Vollkorn-D-Mix

The crunchy wholemeal muesli.

Höveler Original Vollkorn-D-Mix is an energy-rich wholemeal muesli characterised by its high proportion of highly digestible components. The energy comes from highly solubilised cereal flakes, carefully supplemented with dietetically valuable molasses and minerals.

The high energy content not only gives medium to hard-working horses the power they need - it also supports young horses in growth as well as older and heavy-fed horses that have an increased need for energy. Original Vollkorn-D-Mix is particularly low in pellets and therefore also offers an alternative for horses that like to reject pellets.

- **LOW IN PELLETS**
- **> 90 % THERMALLY TREATED GRAINS**
- **HIGHLY DIGESTIBLE**
- **ALSO FOR GROWING HORSES**

## Original Getreide-Mix Gold

The oat-free Basis-Mix.

Höveler Original Getreide-Mix Gold is ideal as a crib feed in addition to roughage (hay).

The reduced content of digestible energy and protein makes Original Getreide-Mix Gold the ideal feed for your leisure horse. The combination of valuable individual components ensures a balanced supply of all basic nutrients for your horse.

Original Getreide-Mix Gold can also be fed in addition to oats to enhance the existing ration.

The grain it contains is highly solubilised to ensure optimum digestion.

## Original Reform-Mix

Combination pack of flakes and pellets.

Höveler Original Reform-Mix is a digestible all-purpose mixture for horses. The muesli mixture for the manger consists of oats, grain flakes and pellets - a combination of specially processed grains with a pelleted mineral and vitamin supplement.

The main sources of energy are hydrothermally solubilised cereal flakes and oats. The gentle manufacturing process makes even difficult-to-digest starch particles easily accessible to your horse.

The advantage: the digestion of carbohydrates takes place entirely in the small intestine. This is very important for the horse's sensitive digestive tract in order to prevent gastrointestinal sensitivities.

The combination of flakes and pellets forms a tasty and balanced basis and makes the addition of other manger feed unnecessary.

- HIGHLY DIGESTIBLE
- THERMALLY TREATED
- GRAIN FLAKES

## Original terabb Basis

Pelleted supplementary feed.

Our pellets have been used successfully in horse feeding for decades.

With the terabb line, we offer customised solutions and ration compositions.

The broad spectrum of the terabb line enables highly digestible, needs- and performance-orientated feeding of leisure, sport and breeding horses.

Original terabb Basis offers a tasty mixture with a moderate energy content that can also be used as the sole manger feed.

The balanced composition ensures simple and safe feeding. The wide Ca:P ratio also allows this pellet to be used as an optimal grain supplement.

With Original terabb Basis, any ration can be built up and combined with any feed.

## Original terabb Classic

The all-time classic.

The classic recipe has been further developed according to the latest nutritional and physiological findings and is ideally suited as a complete supplement to roughage. Original terabb Classic is used as a sole manger feed or as a supplement to grain and thus compensates for deficits in the nutrient supply.

The fully mineralised and vitamin-rich recipe supports the horse's performance. By varying the quantities of terabb Classic feed, leisure and sport horses are provided with the energy they need to perform at their best.

## Original All in One

Established structured fibre feed.

Höveler Original All In One is a high-fibre structured manger feed that is an ideal supplement to conventional grain. The high proportion of structural fibres, which consist of purified alfalfa hay and low-fructan meadow hay, stimulates chewing activity - an essential prerequisite for smooth digestion. With a medium digestible energy content, only 3.8 % sugar and a reduced starch content, it is ideal for leisure and robust horses - even as a sole manger feed.

It can also be combined in reduced quantities with other single or compound feeds and thus also offers sport horses a ration upgrade with structural fibre.

The well-dosed composition of the components ensures a balanced supply of all basic nutrients, minerals and vitamins for your horse.

## Composition

Barley flakes, maize flakes, sunflower husks, 9 % alfalfa, sunflower extraction meal, wheat bran, locust bean meal, 3 % timothy grass, apple pomace, calcium carbonate, brewer's yeast inactivated, linseed oil, barley, sodium chloride, linseed cake, monocalcium phosphate, magnesium oxide

# WESTERN BASIC★

## LEISURE

### Western Basic

The oat-free muesli with low energy content.

Höveler Western Basic is a wholesome muesli and is characterised by its low energy content and moderate starch content of just 13%. This makes Western Basic particularly suitable for light-fed horses or those with less work. The richly textured recipe encourages the horse to chew and thus salivate the feed. In combination with the high degree of digestion of the cereal components, which are fully digested in the horse's small intestine, and the reduction in carbohydrates, Western Basic offers an easily digestible muesli mixture.

The molasses-free formula is fully vitaminised and mineralised and can therefore also be used as a sole manger feed.

Whole plant alfalfa, the queen of forage plants, is rich in amino acids and, in combination with vitamin E and selenium, supports the Western horse's muscle metabolism. Selected herbs also make Western Basic particularly tasty and the high crude fibre content specifically supports the horse's chewing activity.

- OAT-FREE

Fohlenmilch

## Original ZF Plus

For pregnant and lactating mares.

Höveler Original ZF Plus is tailored to the increased requirements of pregnant or lactating mares. The wholesome muesli is particularly rich in energy and protein and contains all the important nutrients to support the mare and foal.

Original ZF Plus contains carefully selected components such as high-quality calcium, essential amino acids and additional vitamins - including vitamin A - and thus compensates for any gaps in the ration.

## Composition

Barley flakes, maize flakes, lucerne green meal, linseed meal, spelt hulls, soya meal, molasses, barley, linseed oil, pea flakes, calcium carbonate, monocalcium phosphate, sodium chloride, magnesium oxide

## Ingredients

Crude protein	15.0 %
Crude fat	4.2 %
Crude fibre	9.0 %
Crude ash	8.0 %
Calcium	1.2 %
Phosphorus	0.6 %
Sodium	0.2 %
Magnesium	0.3 %
Lysine	0.8 %

### Feeding recommendation

Original ZF Plus

From the 8th month of pregnancy, we recommend gradually replacing the usual manger feed with ZF Plus and feeding ZF Plus as the sole manger feed until the 6th month of lactation has been completed.

Feed per 100 kg body weight and day

Pregnancy			
Month	8	9-10	11
Small horse / pony	380	490	590
Warmblood	440	550	640

Lactation			
Month	1-2	3	4-6*
Small horse / pony	800	650	550
Warm blood	900	730	590

\* Slowly phase out ZF Plus and replace it with the usual manger feed.

### Breeding stallions:

up to 900 g/100 kg body weight/day

Daily hay ration: 1.5 kg

Also contains: 50x10h9 CFU/kg  
Saccharomyces cerevisiae

### Packaging units:

### Höveler-measuring unit:

720 g

Article No.  
4808243

**TIP!**

We recommend our Höveler Original Reformat as a ration optimiser.

## Original terabb Breed

Specialised for the needs of mares and foals.

Providing the mare with sufficient energy, protein, minerals and vitamins plays a decisive role in the development of the foal and in milk production. Original terabb Breed has been specially formulated to meet the highly differentiated requirements of heavily pregnant and lactating mares and growing foals. The needs-adapted protein and nutrient content thus creates the basic prerequisites for the development of the unborn foal and supports milk production in the nursing mare.

The calcium and phosphorus content in terabb Breed covers the increased requirements during embryonic skeletal development and later bone growth.

Due to the wide Ca:P ratio, terabb Breed is also suitable as an ideal supplement to grain.

## Composition

Lucerne meal, barley, wheat bran, soya extraction meal, oat husk bran, wheat gluten feed, linseed, calcium carbonate, molasses, sodium chloride, wheat, monocalcium phosphate

## Ingredients

Crude protein	17.0 %
Crude fat	3.8 %
Crude fibre	12.2 %

## Original FohlenMüsli

Amino acids and minerals for the start in life.

Foals have a particularly high need for energy and protein. In the growth phase, the need for nutrients such as calcium, phosphorus, zinc and copper is also increased.

In Höveler Original FohlenMüsli, special attention has been paid to these increased requirements of foals in the growth phase. The energy in Original FohlenMüsli comes from hydrothermally digested grains and is therefore easily digestible. This prevents sensitivity of the digestive tract.

## Composition

Barley flakes, wheat feed meal, maize flakes, puffed maize, 7.5 % soya meal, wheat bran, barley, puffed wheat, molasses, 3 % soya flakes, locust bean meal, sunflower meal, calcium carbonate, linseed, oat flakes, brewer's yeast, glucose, monocalcium phosphate, sodium chloride, linseed oil, whey powder, sunflower oil, magnesium oxide, dextrose

## Ingredients

Crude protein	1.1 %
Crude fat	4.2 %
Crude fibre	3.7 %
Crude ash	5.6 %
Calcium	0.9 %
Phosphorus	0.5 %
Sodium	0.2 %
Magnesium	0.2 %
Potassium	0.8 %
Lysine	1.0 %
Methionine	0.25 %
Threonine	0.53 %

## Digestible energy

per kg DM: 14.8 MJ

Soya extraction meal and steam-heated soya beans are rich in essential amino acids such as lysine and methionine, which are required for organ and muscle development, among other things.

The particularly tasty Original FohlenMüsli is fully mineralised and vitaminised, offers high nutrient availability and can therefore be used as the sole manger feed. Feeding difficulties, which often occur at weaning, are prevented by feeding Original FohlenMüsli at an early stage.

## Convertible energy

per kg DM: 13 MJ

## Digestible crude protein

- IMMUNE SYSTEM

### Feeding recommendation

Original FohlenMüsli

As a supplementary feed to the usual basic supply of mare's milk, roughage and/or pasture grass, we recommend FohlenMüsli for free intake for foals with a final weight of approx. 600 kg from the 2nd week of life until the 2nd month. (no access for the mother mare)

Feed per animal and day

From the 3rd month min. 1 kg - max. 1.5 kg

From the 5th month min. 1.5 kg - max. 2 kg

From the 6th month min. 2 kg - max. 2.5 kg

Feeding depends on the amount of milk the mare produces and the foal's stage of development. Original FohlenMüsli can be fed until the foal is 1 year old.

Small horse/pony approx. 50% less

Thoroughbred/light breed approx. 10 - 15% less

Cold blood/heavy breed approx. 20 - 25% less

Also contains: Methionine, cystine, threonine

## Packaging units:

Höveler measuring unit: 600 g

Article No.  
1029847

## Original terabb Junior

The pelleted foal feed from the terabb line.

Original terabb Junior has been specially tailored to the increased needs of foals and contains all the important nutrients. In the first six months, the energy requirements of foals increase rapidly and steadily.

This is why the energy supply of young foals requires particular care. From the second month of life onwards, as the mother mare's milk production decreases, there is a considerable gap between the foal's energy requirements and the energy supply via the milk.

Original terabb Junior takes this development into account, so that if the foal is fed terabb Junior at an early stage - from the second week of life - such gaps in supply are compensated for. In addition, foals have high protein requirements during the growth phase and muscle development in the first year of life. In addition to the high content of digestible crude protein, special attention was therefore paid to the content of essential amino acids in the development of Original terabb Junior.

## Composition

Barley, extracted soya meal, wheat, oat husk bran, wheat bran, whey powder, maize, wheat gluten feed, molasses, calcium carbonate, linseed, lucerne meal, brewer's yeast, vegetable fat (palm), sodium chloride, refined vegetable fat (coconut), monocalcium phosphate

## Ingredients

Original  
**Fohlenmilch**

## Original Fohlenmilch

The power drink for the foal.

Original Höveler Fohlenmilch provides a balance of energy and nutrients in the event of a lack of milk or loss of the mother mare.

The ingredients in Original Höveler Fohlenmilch fulfil the requirements of suckling foals with regard to the supply of energy, protein, minerals and vitamins. Particular care has been taken in the selection of the protein sources used. The use of cheap protein sources has therefore been deliberately avoided in favour of high-quality skimmed milk and whey powder.

The Original Höveler Fohlenmilch provides a sole substitute for mother's milk in the first weeks after birth if required due to its balanced overall concept or serves as an additional source of supply if the mother mare's milk yield is insufficient.

However, the administration of colostrum from a nurse mare or preserved colostrum and/or the administration of gamma globulins by the vet is necessary for the initial immunisation of the foal in the first few hours after birth.

## Composition

30 % skimmed milk powder, 23 % whey powder, vegetable oil (palm/coconut/rapeseed), 14 % whey powder, pregelatinised wheat flour, egg powder (rich in immunoglobulins), crude lecithin, vegetable fatty acid (palm)

## Ingredients

Crude protein	20.0 %
Crude fat	15.0 %

Selenium**	0.4	mg

\*organically bound

\*\*organically bound in parts

## The following must be observed when preparing and administering FohlenMilch:

The administration of colostrum in the first hours of life after birth is vital. Foal milk cannot replace colostrum. Slow transition from colostrum feeding to Höveler foal milk. This feeding plan serves as a guide; the amount of foal milk fed must be adapted to the individual needs of each foal.

Mixing temperature: 40 - 45 °C

Drinking temperature: 38 - 40 °C

In addition to the feed, Höveler terabb Junior or Höveler FohlenMüsli should be offered from the 2nd week of life. The number of feedings per day depends on the foal's individual condition and age. From the 6th week of life, the amount of foal milk depends on the intake of foal muesli or foal pellets

## SPORTS

**WESTERN  
SPORT**★

Original  
Active

## Original Active

Muesli mixture for sport horses.

Höveler Original Active is specially formulated to meet the energy requirements of horses that have to perform at a high level.

In the formulation, particular emphasis was placed on highly digested ingredients, as these are highly digestible in the small intestine.

The high degree of digestion of these ingredients ensures a rapid energy supply and thus a noticeably higher willingness to perform of the horse.

In addition, special attention was paid to the selection of vegetable oils as an energy source. High-quality linseed oil specifically supplements the formulation with important fatty acids and serves as a further source of energy. A special combination of vitamins, minerals and organically bound trace elements round off the composition.

The levels of essential amino acids such as lysine and the high content of antioxidant additives such as vitamin E and selenium also support muscle metabolism.

## Composition

maize flakes, puffed barley, 18 % black oats, apple pomace, linseed meal, soya meal, molasses, 3.5 % linseed oil, calcium carbonate, sodium chloride, beetroot, monocalcium phosphate, magnesium oxide, brewer's grains, brewer's yeast

### TIP!

Original Active is also used as an energy and amino acid supplement due to its special formulation.

## Original Relax

The tasty muesli mix with extra magnesium.

Höveler Original Relax is an oat-free muesli mixture with an increased magnesium content. In order to promote the horse's well-being, special attention has been paid to optimising the digestibility of the muesli mixture.

High-quality linseed oil provides the horse with energy and essential fatty acids.

Furthermore, ingredients such as wheat, barley and maize have been hydrothermally digested in order to achieve a high degree of digestion and thus reduce the amount of feed used. The addition of lucerne and pea flakes optimises the muesli's amino acid profile and the carob pieces it contains make it particularly tasty.

## Composition

Maize flakes, barley flakes, wheat flakes, wheat, wheat bran, 6 % lucerne green meal, 5.5 % pea flakes, 2.5 % carob pieces, barley, calcium carbonate, beet molasses, 1.5 % linseed oil, magnesium oxide, sodium chloride, monocalcium phosphate, brewer's grains, brewer's yeast

## Original terabb Sport

The crunchy 10 mm sport pellets.

Original terabb Sport covers all the nutritional requirements of sport horses as the sole manger feed. The selected grain mixture in terabb Sport makes the additional administration of grain or other manger feeds unnecessary.

However, if your horse has special requirements, the nutrient composition allows combinations with different types of grain, supplements or other manger feeds.

By varying the quantities of terabb Sport feed, horses can be supplied with the energy they need to perform. The crunchy 10 mm pellets compensate for deficits in the supply of vitamins and minerals due to fluctuations in the quality of the hay or oats.

If the feeding recommendations are not met, we recommend the appropriate addition of a mineral feed, e.g. Original ReforminPlus.

### TIP!

In case of heavy sweat loss, attention should be paid to the electrolyte balance. We recommend ELEKTROLYTE PLUS from the Höveler Vitality Line.

## Western Sport

Starch-reduced muesli mix with a plus for the muscles.

Höveler Western Sport is an energy-rich, but low-cereal muesli that completely covers the vital nutrient requirements of medium to intensively trained western horses. Experience has shown that the energy requirements of western horses are somewhat lower than those of many other horses. Nevertheless, the need for amino acids, vitamins and trace elements is identical to other breeds used in competition disciplines. This tasty and highly digestible muesli, which deliberately does not contain any added oats, was created with these factors taken into consideration.

Thanks to the fully vitaminised and mineralised recipe, Western Sport can be used as a sole manger feed. Alfalfa, extracted soya meal and pea flakes also provide an optimum ratio of essential amino acids for targeted muscle build-up.

Western Sport therefore offers good support for muscle build-up not only for western horses that are exposed to increased demands in competition sport, but also for horses of other breeds.

## Composition

28 % alfalfa, barley flakes, sunflower husks, sunflower extraction meal, linseed cake, maize flakes, barley, locust bean meal, 3.5 % pea flakes, sunflower oil, molasses, calcium carbonate, wheat bran, 1.5 % soya extraction meal, maize, sodium chloride, monocalcium phosphate, brewer's yeast inactivated, linseed oil, magnesium oxide

## Original PUR.ITAN

The grain- and molasses-free muesli for complete supply.

Höveler Original PUR.ITAN is a complete muesli without molasses and grain components. This makes it possible to feed horses with sensitive metabolisms a more reduced and varied diet.

The PURITAN line, which is gentle on the stomach and intestines, enables a needs-based supply of vital substances such as vitamins, minerals, energy and amino acids.

Original PUR.ITAN can be used to feed sport and leisure horses and, thanks to its completely vitaminised and mineralised formula, ensures

that the horse is supplied with all the vital substances it needs. The significant reduction in easily digestible carbohydrates supports the metabolism.

The balanced content of amino acids and energy makes Höveler Original PUR.ITAN an important building block in the feeding programme. Components with prebiotic ingredients such as pectins support digestion and the well-being of horses.

## Original PUR.SPORT

The energy and protein-rich sports muesli from the PURITAN range.

With the PURITAN feed range, Höveler offers the opportunity to feed horses that have to be fed grain- and molasses-free a high-quality diet that meets their needs.

Thanks to its starch and sugar-reduced recipe, Original PUR.SPORT is not only suitable for horses with a sensitive metabolism or gastrointestinal tract, but for all horses used for sport that should be fed grain- and molasses-free. Original PUR.SPORT contains a broad spectrum of vitamins and minerals, is rich in protein and thus optimally supports muscle metabolism.

The low sugar and starch content makes the original PUR.SPORT very well tolerated and gentle on the stomach. In addition to important fatty acids, numerous linseeds also provide mucilage, which relieves the stomach lining. PUR.SPORT is suitable for horses with a sensitive metabolism and gastrointestinal tract. The carefully selected components, the content of natural essential amino acids, a high vitamin E content, numerous organically bound trace elements and sufficient energy make PUR.SPORT a grain-free and tasty alternative to conventional sports horse feed!

## Composition

Sunflower extraction meal, 15 % linseed hulls, sunflower husks, 5 % linseed toasted rolled, 4.7 % linseed, linseed oil, pea flakes, locust bean meal, linseed cake, soya hulls, soya flakes, sodium chloride, calcium carbonate, apple pomace, monocalcium phosphate, inulin, magnesium oxide, coconut, brewer's yeast inactivated, 0.6 % alfalfa dehydrated

## SPECIAL REQUIREMENTS

### GRAIN-FREE

- MUSCULATURE
- BUILD-UP
- ESSENTIAL AMINO ACIDS
- GENTLE ON THE STOMACH
- MUSCLE METABOLISM

#### Feeding recommendation

Original PUR.MUSKEL

Feed per 100 kg body weight and day

For general support of muscle build-up:

Light work: 30 - 50 g

Medium work: 50 - 80 g

Heavy work: 80 - 100 g

For horses with sensitive muscle metabolism: 100 - 200 g

Daily hay ration: 1.5 kg

Also contains:

lysine: 0.85 %, methionine: 0.25 %,

methionine + cysteine: 0.5 %,

threonine: 0.6 %

#### Packaging units:

**Höveler measuring unit:**

1,000 g

Article no.  
9575884

## Original PUR.MUSKEL

The special muesli to support muscle metabolism without alfalfa.

PUR.MUSKEL complements the PURITAN line with a muesli that specifically supports sensitive muscle metabolism thanks to its special recipe.

PUR.MUSKEL is an energy and protein-rich muesli without alfalfa for targeted and healthy support of the muscles. The tasty special muesli has been designed without additional vitamins and minerals - so it can be incorporated very specifically into the horse's individual ration.

PUR.MUSKEL is suitable for supporting the musculature of all horses. Metabolically sensitive horses in particular can benefit from the optimum content of essential amino acids to support muscle metabolism, while the low sugar and starch content of less than 10 % makes PUR.MUSKEL very well tolerated, gentle on the stomach and supportive of the intestines.

PUR.MUSKEL therefore offers ideal support for horses with sensitive metabolisms, stomachs and intestines and also provides targeted support for horses that are difficult to feed or older horses.

## Composition

Timothy grass, soya flakes, linseed, sweet lupin flakes, sunflower extraction meal, pea flakes, sunflower seed, apple pomace, linseed oil, magnesium oxide, sodium chloride, grape seed meal, rose hip

## Ingredients

Crude protein	20.0 %
Crude fat	15.0 %
Crude fibre	18.7 %
Crude ash	7.2 %
Calcium	0.45 %
Phosphorus	0.4 %
Sodium	0.4 %
Magnesium	0.8 %

### TIP!

For optimum supply, a mineral feed, e.g. REFORMINPLUS or equinova® Vitalysan, is recommended when feeding PUR.MUSKEL as the sole manger feed.

## SPECIAL REQUIREMENTS

### GRAIN-FREE

- IMMUNE SYSTEM
- MUCILAGE
- STOMACH & INTESTINE
- MOLASSES-FREE
- NO ALFALFA

#### Feeding recommendation

##### Original PUR.GASTRO

PUR.GASTRO is used as the sole manger feed for sensitive horses. Feed per 100 kg body weight and day\*

Light work:	200 g
Medium work:	400 g
Heavy work:	up to 600 g
Daily hay ration:	1,5 kg
To enhance the existing ration:	
	100-150 g/100 kg body weight per day

\* The normal ration is reduced by the amount of PUR.GASTRO fed in each case. If the feeding recommendations are not met, it is necessary to add a mineral feed (e.g. equinova® VITALYSAN). PUR.GASTRO is also suitable for long-term feeding. We recommend soaking PUR.GASTRO for young horses, old horses, horses with dental problems and horses that eat hastily.

#### Packaging units:

#### Höveler measuring unit:

900 g

Article no.  
9368225

## Original PUR.GASTRO

The grain-free manger feed for horses with a sensitive gastrointestinal tract.

Horses with a sensitive gastrointestinal tract benefit from the grain- and molasses-free recipe. The carefully selected, high-quality components that have been proven to be gentle on the stomach, including numerous mucilage-forming components, make Original PUR.GASTRO an ideal manger feed for horses with sensitive stomachs. Linseed provides important fatty acids as well as mucilage, which relieves the stomach lining.

Original PUR.GASTRO is grain- and molasses-free, fully mineralised and vitaminised and, thanks to its harmonious composition, is suitable as a manger feed for sensitive horses and can be individually dosed according to the horse's needs. Original PUR.GASTRO can therefore be used both as the sole manger feed and to supplement and enhance the existing ration. The high fibre content of around 25 % also ensures a longer chewing time and therefore increased saliva production in the horse. The sodium bicarbonate contained in the saliva buffers the stomach acid. The 10 mm pellets can also be soaked if required.

## Composition

29 % linseed hulls, 15 % sunflower hulls, pea flakes, 11 % linseed, timothy grass, apple pomace, linseed cake, sodium chloride, magnesium oxide, monocalcium phosphate, chicory, calcium carbonate, grape seed meal, beta-glucans

## Ingredients

## Original PUR.SENIOR

The grain- and molasses-free muesli for older horses.

With the PURITAN feed range, Höveler offers the opportunity to feed horses that have to be fed a grain- and molasses-free diet in a high-quality and needs-orientated way.

Original PUR.SENIOR is fully mineralised and vitaminised, offers a low-carbohydrate formula and is therefore also suitable for horses with a sensitive metabolism.

Höveler Original PUR.SENIOR provides an increased level of proteins, essential amino acids and nutrients. This requirement increases with age. Adapted to the nutritional requirements of an older horse, this muesli contains less energy

and instead high-quality amino acids as well as readily available minerals such as zinc, copper, selenium, manganese, cobalt and magnesium. This specially developed combination of vital nutrients ensures a balanced diet for horses, even with increased requirements in old age.

PUR.SENIOR can be soaked in water in a short time if required and can therefore also be fed as a mash. Alfalfa and pea flakes ensure an optimum supply of amino acids. Digestive raw materials such as apple pomace and brewer's yeast have a positive effect on the intestinal flora and thus support the vitality of the ageing horse.

## Composition

30 % alfalfa, sunflower husks, sunflower extraction meal, 11 % apple pomace, linseed cake, 5 % pea flakes, 4.6 % linseed oil, sweet lupin flakes, chicory powder, 1 % brewer's yeast, sodium chloride, monocalcium phosphate, magnesium oxide, calcium carbonate, carrots, nettle leaves

Original PUR.KRÄUTER

Feed per 100 kg body weight

Permanent feeding: 100 g

Short term feeding\*: 200 g

Daily hay ration: 1.5 kg

\* for example, seasonal feeding (spring/autumn)

Herbs contained:  
 Nettle leaves, marshmallow leaves, marshmallow root, spruce needles, green oats, mugwort, parsley, fenugreek, lovage root, rose hip peel, calamus root, goldenrod herb, marshmallow blood, Iceland moss, dandelion root

## Original PUR.KRÄUTER

The grain- and molasses-free herbal muesli with 16 real herbs.

With the PURITAN feed range, Höveler offers the opportunity to feed horses that require a grain- and molasses-free diet a high-quality feed that meets their needs.

The original Höveler PUR.KRÄUTER supplements the PURITAN range with a grain- and molasses-free herbal muesli. The carefully selected components in this special muesli are refined with our tried and tested, fine blend of natural herbs.

The recipe is rounded off with linseed oil as a source of omega-3 fatty acids and native antioxidants from grape seed flour.

Original PUR.KRÄUTER supplements the ration or alternatively serves as the sole manger feed. The tasty PUR.KRÄUTER was designed without additional vitamins and minerals and therefore also offers a useful addition to existing rations. Like all concentrates in the Höveler range, Original PUR.KRÄUTER is ADMR-compliant!

## Composition

Meadow timothy, sunflower husks, sunflower extraction meal, pea flakes, apple pomace, linseed hulls, linseed cake, toasted rolled linseed, 3.3 % linseed oil, carrots, fructooligosaccharides, green meal, 0.5 % grape seed meal, 0.5 % black cumin seed, 0.5 % herbs (nettle leaves, marshmallow leaves, marshmallow root, spruce needles, green oats, mugwort, parsley, fenugreek, lovage root, rose hip peel, calamus root, goldenrod herb, marshmallow flowers, Iceland moss, dandelion root), sunflower oil

## Original PUR.MASH

The grain-free mash to support the stomach and intestines.

Original Höveler PUR.MASH is ideal for horses with a sensitive metabolism and a sensitive stomach and intestinal tract thanks to its grain- and molasses-free recipe.

With the help of numerous mucilage-forming components, Original PUR.MASH ensures a mash feed that is gentle on the stomach with the best possible utilisation.

The prebiotic ingredients it contains help to stabilise the flora in the large intestine. The positive support of the stomach and intestines promotes healthy digestion and therefore the horse's well-being.

Original PUR.MASH can be mixed with both cold and warm water. It can be fed 1-3 times a week or even daily.

## Composition

Sunflower extraction meal, 25 % sunflower husks, apple pomace, green meal, locust bean meal, pea flakes, linseed toast, linseed oil, carrots, linseed cake, brewer's yeast inactivated, calcium carbonate, chicory powder, psyllium, sodium chloride, monocalcium phosphate, fennel seed, chamomile herb, magnesium oxide

#### Feeding recommendation

Original PUR.LUZERNE

Feed per 100 kg body weight and day

No work:	0.1-0.2 kg
Light work:	0.2-0.3 kg
Medium/heavy work:	0.3-0.4 kg
Thin horses:	0.3-0.4 kg

Feeding instructions:

Original PUR.LUZERNE should be fed soaked. The soaking time is approx. 15 minutes in warm water.

\*1.2 kg alfalfa can replace approx. 1 kg grain

## Original PUR.LUZERNE

Alfalfa cob from the PURITAN line without additives.

With the PURITAN feed range, Höveler offers the opportunity to feed horses that have to be fed grain- and molasses-free a high-quality feed that meets their needs.

Original Höveler PUR.LUZERNE is an alfalfa cob, pressed from young alfalfa with a high leaf content. As a straight feed, it contains no artificial additives, flavourings or molasses.

Original PUR.LUZERNE is gently pressed and therefore contains all the vital substances that make alfalfa so special as the 'queen of forage plants'.

Thanks to its good ratio of essential amino acids, alfalfa promotes muscle development and is equally suitable for horses that are too thin, sport horses, growing horses and breeding horses.

Lucerne also has a high calcium content, making it ideal as a supplement to grain rations.

Original PUR.LUZERNE can also be used as a grain substitute\*.

## Composition

Whole plant lucerne

## Original PUR.STRUKTUR

The structured feed from the PURITAN line.

Original Höveler PUR.STRUKTUR supplements the PURITAN line with a structured feed that enhances the overall ration with selected components containing high-quality fibre.

Like the entire PURITAN line, Original PUR.STRUKTUR is grain- and molasses-free.

As a structured feed, Original PUR.STRUKTUR has no additional vitaminisation or mineralisation! The muesli can therefore be fed to an existing ration to enhance it with additional fibre and promote the horse's chewing activity.

Original PUR.STRUKTUR has a balanced and tasty recipe with a low starch and sugar content and added value: numerous selected components are naturally rich in vitamins and minerals and also provide valuable fibre and mucilage, thus offering positive properties for the entire gastrointestinal tract. Thanks to its carefully selected composition, Original PUR.STRUKTUR is suitable for upgrading the complete ration and enhances the basic hay ration in terms of both quantity and quality. It can be added to existing rations or fed as the sole manger feed.

## Composition

Extracted sunflower meal, alfalfa, 17.6 % sunflower husks, timothy hay, 6.6 % linseed hulls, soya hulls, locust bean meal, linseed cake, linseed oil, meadow grass and herb flakes, apple pomace, grape seed meal, green meal, dandelion leaves

## Ingredients

## Original KräuterMüsli

The fine mixture is what makes it so special.

Höveler Original KräuterMüsli is a dust-free muesli with the added bonus of 16 real herbs. The selected mixture of natural herbs refines the oat-free muesli mix into an aromatic, fragrant and particularly tasty supplementary feed.

The supply of B vitamins to the horses is positively supported by the addition of brewer's yeast. Moderate levels of digestible protein and digestible energy as well as their close ratio to each other make the muesli a universal supplement to a wide variety of rations.

The particularly tasty recipe is optimised with all bulk elements, vitamins and organically bound trace elements.

Thanks to high-quality vegetable oils and the selected molasses content, Original KräuterMüsli is an absolutely dust-free feed that is also ideal for sensitive horses.

Like all Höveler concentrates, Original KräuterMüsli is ADMR-compliant!

## Original KräuterBriXX

The complete manger feed in BriXX form.

The innovative Höveler Original KräuterBriXX offer a special type of feeding and promote the natural eating and chewing behaviour of horses. Selected grasses from the foothills of the Alps - refined in a gentle processing method with our valued classic Original KräuterMüsli - promote a significant increase in eating and chewing time in the handy BriXX format with its high fibre content, which has a positive effect on the entire digestive tract.

Like our classic Original KräuterMüsli, Original KräuterBriXX contain the popular mixture of 16 real herbs.

Carefully selected components as well as all important bulk elements, vitamins and trace elements round off the oat- and alfalfa-free recipe. The structure-rich and flavoursome KräuterBriXX offer an opportunity to enhance the quality and quantity of roughage. The practical BriXX supplement an existing ration or are fed as the sole manger feed and are therefore ideal for on the go.

The Höveler Original KräuterBriXX, like all Höveler concentrate varieties, are ADMR-compliant!

### Composition

50 % hay, maize flakes, barley flakes, locust bean meal, molasses, barley, sunflower extraction meal, extruded maize, sunflower oil, calcium carbonate, wheat semolina bran, brewer's yeast, monocalcium phosphate, linseed oil, sodium chloride, maize germ, nettle leaves, magnesium oxide, beetroot, dextrose, 0.5 % herbs (marshmallow leaves, spruce needles, marshmallow root, green oat straw, parsley, fenugreek seeds, rose hip peel, mugwort herb, lovage root, turmeric, calamus root, goldenrod herb, Iceland moss, marshmallow flowers, dandelion root)

### Ingredients

## Original Oldie-Mix

Tasty and highly digestible muesli - specialised for the changing needs of older horses.

Höveler Original Oldie-Mix is an oat-free muesli and provides the horse with a nice energy boost. The muesli contains specially hydrothermally treated grain components that are easy to chew and enable optimum starch digestibility in the small intestine thanks to the high degree of digestion. This significantly reduces the risk of incorrect fermentation, a common consequence of carbohydrates passing into the large intestine.

## Composition

Barley flakes, lucerne, maize flakes, puffed barley, sunflower extraction meal, sunflower husks, puffed maize, puffed wheat, molasses, 2.5 % liquid glucose, 2.13 % linseed oil, glycerine, monocalcium phosphate, linseed cake, sodium chloride, sunflower oil, calcium carbonate, 0.1 % dried banana

## Ingredients

Crude protein	10.5 %
Crude fat	4.6 %
Crude fibre	11.5 %
Crude ash	6.1 %
Calcium	0.9 %
Phosphorus	0.5 %
Sodium	0.3 %
Magnesium	0.2 %
Starch	35.0 %
Sugar	4.9 %

## Digestible energy

per kg DM: 12.8 MJ

In the carefully selected recipe, particular attention was paid to easily digestible components. The nutrient composition is specially tailored to the changing needs of older horses. The high glucose content and linseed oil also provide horses with higher requirements with quickly available energy.

Vegetable oils also ensure a dust-free feed, making Original OldieMix suitable for horses that are sensitive to dust. The high flake content in combination with a little extra banana also makes the Oldie-Mix a particularly tasty muesli mixture.

## Original ProBalance

The oat-free muesli with live yeast.

The original oat-free Höveler ProBalance offers a highly processed and easily digestible muesli mixture with live yeast and valuable trace elements and vitamins. The live yeast (*Saccharomyces cerevisiae*) it contains has positive effects on fibre digestibility in the large intestine, among other things. The tasty muesli mixture is also supplemented with brewer's yeast, which is rich in native B vitamins and biotin.

### Composition

Barley flakes, maize flakes, wheat bran, lucerne green meal, spelt hulls, wheat, barley, beet molasses, pea flakes, linseed oil, wheat, puffed, calcium carbonate, brewer's grains, lucerne hay, maize, puffed, 1.5 % brewer's yeast, carrots, dried, monocalcium phosphate, sodium chloride

### Ingredients

Crude protein	10.7 %
Crude fat	5.0 %
Crude fibre	9.1 %
Crude ash	7.0 %
Calcium	1.4 %
Phosphorus	0.6 %
Sodium	0.17 %
Magnesium	0.16 %

## Original Reformhafer

The dust-free classic.

Höveler Original Reformhafer is a natural muesli consisting of high-quality oats, various grain by-products, molasses and minerals. The well-balanced components - together with the close ratio of digestible protein to digestible energy - make Original Reformhafer an ideal ration supplement for horses that have to perform light to medium work.

The well-dosed molasses and bran content makes Original Reformhafer a valuable feed that has a mild laxative effect and thus supports the horse's sensitive digestive tract.

The low protein and energy content of Original Reformhafer makes the muesli the ideal manger feed for horses at times when their requirements are low.

The high molasses content minimises dust formation and makes it particularly palatable. A feed that experience has shown attracts even poor eaters to the manger again and again.

## Composition

Molasses, oat husk bran, rolled oats, Oat hulls (reformed oats contain beet molasses and therefore have approx. 18% moisture and are preserved with propionic acid)

## Ingredients

Crude protein	7.7 %
Crude fat	2.5 %
Crude fibre	13.5 %
Crude ash	8.0 %
Calcium	1.3 %
Phosphorus	0.3 %
Sodium	0.6 %

## Original BT-Hefe Press

Brewer's yeast with a plus!

Höveler Original BT-Hefe Press is a supplementary feed for horses with a highly concentrated content of brewer's yeast and brewer's grains.

Dried brewer's grains are extremely rich in crude fibre, brewer's yeast is rich in vitamin B and supports the flora of the large intestine with its prebiotic properties.

The sensitive ingredients of brewer's yeast are fully preserved in Original BT-Hefe Press due to the gentle drying process at low temperatures.

Natural amino acids, fatty acids, numerous vitamins as well as bulk and trace elements make BT-Hefe Press an important feed supplement for horses in times of increased demand (e.g. during coat changes, sport or breeding). Brewer's yeast provides high native levels of biotin, among other things, and can therefore also positively support coat and hoof quality. In addition, Original BT-Hefe Press provides extra protein and therefore also has a positive effect on the horse's muscle metabolism. The combination of brewer's yeast, linseed and wheat bran also supports the sensitive digestive tract.

### Composition

46 % brewer's grains, 32 % brewer's yeast, 10 % extruded linseed, 4 % wheat bran, calcium carbonate, molasses, dextrose, sodium chloride

### Ingredients

Crude protein	29,0 %
Crude fat	8,0 %
Crude fibre	9,0 %
Crude ash	10,0 %
Calcium	1,6 %
Phosphorus	0,8 %
Sodium	0,3 %
Magnesium	0,2 %
Starch	5,3 %
Sugar	3,6 %

### Digestible energy

per kg DM: 13.8 MJ

### Convertible energy

- **BREWER'S YEAST**
- **BIOTIN**

### Feeding recommendation

Original BT-Hefe Press

Feed per 100 kg body weight and day  
50 g to supplement the usual ration

Daily hay ration: 1.5 kg

Also contains:

lysine: 1.56 %, methionine: 0.5 %, threonine: 1.2 %

### Packaging units:

8 kg bucket  
Article no.  
4808264

25 kg bag  
Article no.  
1029883

### TIP!

Original BT-Hefe Press also specifically optimises existing rations with proteins and amino acids and thus supports the muscles.

## Original SENIOR-Cobs

The hay substitute with added energy and protein.

Höveler Original SENIOR-Cobs offer a high level of crude fibre and therefore a way of ensuring the supply of crude fibre - even in old age.

If a horse has already lost its teeth or worn them down to a very high level, it is usually no longer able to consume raw fibre-rich roughage such as hay, grass, haylage and straw in its natural form. However, horses need a minimum amount of roughage to maintain sensitive digestive processes, which must not be less than 1-1.5 kg per 100 kg body weight. Weight loss and the resulting reduction in vitality are the first signs of insufficient intake of digestible crude fibre. Original SENIOR-Cobs are fed soaked and require about 20 minutes soaking time.

### Ingredients

Crude protein	11.0 %
Crude fibre	23.6 %
Crude ash	6.8 %
Crude fat	2.7 %

### Digestible crude protein

per kg DM: 10.2 MJ

## Original Heu Cobs

The high-quality hay substitute for all horses.

The best green feed is mown at the optimum cutting time and immediately dried in a gentle warm air process. The dried material is then pressed into 15 mm diameter cobs while retaining the horse-friendly roughage structure. Our Höveler Original Heu Cobs are low in dust and therefore particularly suitable for horses with sensitive mucous membranes.

Original Heu Cobs require little storage space, are conveniently packaged, extremely practical to feed and also suitable for automatic feeding.

Due to their special processing method, our Original Heu Cobs can also be fed dry after a familiarisation phase and to horses that do not eat hastily and have functioning teeth.

If you want to soak Original Heu Cobs, they need up to 12 hours to swell. If this swelling time is too long for you, you can choose our fast-swelling (approx. 20 min) Höveler Original SENIOR-Cobs.

### Ingredients

Crude protein	9.5 %
Crude fibre	23.0 %
Crude ash	11.0 %
Crude fat	30 %

Does your horse refuse hay cobs? Then try Original PUR.LUZERNE.

# WESTERN PUXX★

## ORIGINAL WESTERN PUXX

Roughage cubes with the plus.

Höveler Western PUXX offer a tasty supplement for horses of all ages and performance levels. Western PUXX can be used in addition to the usual ration or as the sole manger feed and is particularly suitable for competitions or trail rides. However, these long-fibre Western PUXX can also be used as a daily meal to support longer eating and chewing times and therefore healthy digestion.

The high-quality structured feed made from alfalfa and timothy improves the salivation of the feed and can compensate for this in times of hay shortage. The alfalfa contained in Höveler

Western PUXX is a mixture of structure and numerous vital substances such as amino acids, which support targeted muscle development.

Höveler Western PUXX therefore offers a combination of basic feed and muscle build-up concentrate, rounded off with highly processed grain flakes for optimum energy supply. The feeding of additional concentrates is possible in combination with Höveler Western PUXX, but is no longer absolutely necessary. Höveler Western PUXX can be given to horses with intact teeth without soaking.

## Composition

43 % timothy grass, 40 % lucerne, barley flakes, maize flakes, soya extraction meal, apple pomace

## Ingredients

Crude protein	11.8 %
Crude fat	2.4 %
Crude fibre	28.7 %
Crude ash	7.1 %
Calcium	0.7 %
Phosphorus	0.3 %
Sodium	0.1 %
Magnesium	0.1 %

## Original ReformMash

To support the horse's sensitive digestive tract.

Höveler Original ReformMash is a tasty and digestible mash mixture that does not require any pre-treatment such as boiling linseed. The mash is designed according to the classic mash recipe using specially treated, micronized linseed and can therefore also be prepared with lukewarm/hot water. Höveler Original ReformMash is rich in valuable fibre from components such as oat flakes and wheat bran and offers high levels of vegetable fatty acids, not least because it is rich in linseed oil.

In addition, the high levels of antioxidants such as vitamin E and selenium together with numerous other nutrients round off the recipe.

Original ReformMash should always be prepared and fed fresh. In the event of incomplete intake, we recommend removing the leftovers from the trough for hygienic reasons.

## Composition

28 % oat flakes, 18 % wheat bran, oat husk bran, barley, 17 % linseed, extruded, beet molasses, calcium carbonate, 6 % linseed oil, brewer's grains, sodium bicarbonate, brewer's yeast, carob pieces

## Ingredients

Crude protein	13.0 %
Crude fat	9.0 %
Crude fibre	8.5 %
Crude ash	7.0 %
Calcium	0.9 %
Phosphorus	0.5 %
Sodium	0.3 %
Magnesium	0.2 %

720 g

Article no.  
4808217

### TIP!

Original ReformMash offers a particularly fine structure and numerous mucilage-forming ingredients. Preparation with hot water promotes mucilage formation.

## Original Summer Mash

Summer Mash - the iced tea for horses - grain-free!

The special concept with the addition of micronized linseed makes it possible to prepare our Höveler Summer Mash cold and thus prepare an "iced tea" for the horse. Giving the Summer Mash compensates for slight electrolyte losses as well as providing additional hydration.

The additional electrolytes serve to compensate for increased sweating so that the horse's vitality is not impaired by the loss of sweat and thus electrolytes.

The citrus peel makes the product not only an absolute specialty, but also provides important prebiotics, supports the intestinal flora and the immune system in a natural way.

In dry pastures, more sand can be absorbed through grazing. Psyllium seeds provide valuable fibre and are considered a gentle way of transporting sand out of the intestines.

When composing Summer Mash, special attention was paid to the special needs of horses in summer by adding electrolytes. The mash is grain-free and gentle on the stomach and intestines.

## Composition

Timothy hay, alfalfa, sunflower extraction meal, apple pomace, sunflower husks, meadow grass and herb flakes, 6.3 % linseed cake, 5 % linseed toasted and rolled, Brewer's yeast, linseed oil, sodium chloride, marigold, psyllium seeds (0.5 %), grape seed flour, potassium chloride, citrus peel NOR Spice AB (0.08 %), sodium bicarbonate, dextrose, magnesium oxide, sodium tripolyphosphate

## Ingredients

Crude protein	15.2 %
Crude fat	7.1 %
Crude fibre	25.5 %
Crude ash	8.4 %
Calcium	0.6 %
Phosphorus	0.4 %
Sodium	0.74 %
Magnesium	0.19 %
Chloride	1.0 %
Starch	3.0 %
Sugar	3.7 %

### TIP!

Original Summer Mash offers the perfect support in summer. Do you already know our fall/winter edition - the Original PferdePunsch?

Original  
**PferdePunsch**

## ORIGINAL PferdePunsch

The warm meal to support the entire gastrointestinal tract - especially in fall and winter.

The focus of many horse owners is usually on the change in feed from spring to summer and therefore on grazing. However, the change from lush grass in summer to more raw fiber-rich hay and straw in autumn and winter should not be ignored either.

Original PferdePunsch is particularly rich in fiber from valuable oat flakes and contains mucilage-forming components such as sunflower husks as well as apple pomace rich in pectin and crude fiber.

## Composition

18 % rolled oats, timothy grass, 15 % sunflower husks, green meal, puffed barley, 10 % apple pomace, wheat bran, psyllium, sunflower extraction meal, beet, 1.5 % fermentation product of *Saccharomyces cerevisiae*, molasses, linseed cake, fennel seed, black cumin seed, linseed oil, citrus peel Nor Spice AB (0.08 %)

## Ingredients

Crude protein	10.9 %
Crude fat	3.9 %
Crude fibre	20.4 %
Crude ash	5.1 %
Calcium	0.4 %
Phosphorus	0.3 %
Sodium	0.14 %
Magnesium	0.13 %
Starch	18.5 %
Sugar	5.2 %

The high levels of mucilage and pectins support the stomach and intestines. The special recipe is rounded off with prebiotic components, *Saccharomyces cerevisiae* and herbs, making PferdePunsch a tasty mash.

Original PferdePunsch also contains citrus pomace, which has prebiotic properties. It is 100% natural and provides valuable pectins and flavonoids.

Are you looking for a grain-free alternative for daily feeding? Then take a look at our Original PUR.MASH!

# Höveler

## MINERALS / VITAMINS

## Original Reformat

Mineral and protein supplement for training, breeding and sport.

Original Höveler Reformat offers a combination of important minerals and proteins in one. The sophisticated combination of vitamins, bulk and trace elements and readily available carbohydrates replenishes depleted reserves quickly and in a targeted manner. The particularly broad amino acid ratio of soya and brewer's yeast supports targeted muscle build-up in sport and breeding horses.

The high, harmonised levels of vitamins A, D3, E and C and the  $\beta$ -carotene content support the immune system.

The trace elements contained are involved in numerous enzyme functions in energy and muscle metabolism, promote the formation of red blood pigment (important for sufficient oxygen transport to the muscles) and thus provide the basis for the horse's vitality and willingness to perform. As a protein, vitamin and mineral supplement, Allrounder Original Reformat supports the muscles and performance of your sport horse, provides essential amino acids and nutrients for your breeding horse and supports the development of your youngster.

## Composition

Brewer's grains, 16 % brewer's yeast, 16 % steam-heated soya meal, lucerne green meal, linseed meal, wheat bran, linseed extrudate, calcium carbonate, dextrose, molasses, sodium chloride. Calcium carbonate, dextrose, molasses, sodium chloride

### TIP!

Allrounder Original Reformat optimises your sport horse's willingness to perform, meets the high amino acid requirements of your breeding horse, supports the healthy growth of your youngster and keeps even heavy-fed and older horses in good condition.

## REFORMINPLUS

MINERALFUTTER FÜR PFERDE

### MINERALS / VITAMINS

## Original REFORMINPLUS

Vitaminised mineral feed for every ration.

REFORMINPLUS was designed according to the latest scientific and practical findings to close supply gaps in the daily feed. It is not uncommon for conventional rations to have considerable deficits in the supply of minerals and vitamins. Often the basic feed used also has site-related deficiencies in numerous trace elements (e.g. selenium, copper, iodine etc.).

The formula of Original REFORMINPLUS supports all metabolic processes in the animal's body.

The vitality and performance of horses depend to a large extent on their needs-based supply.

That is why REFORMINPLUS should be an integral part of every feed ration - especially in phases in which the entire metabolic processes are intensified.

These include periods of high stress in sport, pregnancy and foal rearing.

- MARKET LEADER IN GERMANY FOR 50 YEARS
- MOLASSES-FREE
- DUST-FREE
- TASTEFUL
- EASY TO DOSE

#### Feeding recommendation

Original REFORMINPLUS

15 g per 100 kg body weight

Large horses (trotters, gallopers, competition horses)

100 g / day to the normal ration

Breeding horses (stallions, pregnant and lactating mares)

150 g / day to the normal ration

Yearlings and small horses

80 g / day to the normal ration

Foals and ponies

50 g / day to the normal ration

Daily hay ration: 1.5 kg

## Composition

## REFORMINMÜSLI

ERGÄNZUNGSFUTTERMITTEL FÜR PFERDE

### Original REFORMINMÜSLI

Tasty, vitaminised mineral muesli.

Höveler Original REFORMINMÜSLI was developed and tested by scientists in co-operation with experienced practitioners and represents an ideal alternative to conventional mineral and vitamin supplements.

The tasty grain- and molasses-free muesli is very well accepted. ReforminMuesli is particularly suitable for robust horses and for horses that need a mineral supplement but should not be fed concentrates.

REFORMINMÜSLI is an excellent supplement to all minerals in the basic feed as well as all vitamins and trace elements in concentrations that cover requirements.

The composition of the REFORMINMÜSLI batches is continuously tested. The vitality and performance of horses depend to a large extent on the supply of the right nutrients. ReforminMüsli therefore makes an important contribution to the horse's mineral and vitamin supplementation and should not be missing from its daily ration.

### Composition

**REFORMINLIQUID**  
ERGÄNZUNGSFUTTERMITTEL FÜR PFERDE

## Original REFORMINLIQUID

Liquid vitamins and minerals.

Höveler Original REFORMINLIQUID was developed and tested by scientists in co-operation with experienced practitioners and represents an ideal alternative to conventional mineral and vitamin supplements.

The composition of REFORMINLIQUID is constantly reviewed and optimised as part of our quality management, as the vitality and performance of horses depend to a large extent on the supply of minerals and vitamins in line with their needs. REFORMINLIQUID makes an important contribution to this and should not be missing from any ration.

REFORMINLIQUID is the perfect alternative for horses that tend to select individual components out of the ration. Thanks to its composition, it can be easily mixed into any ration.

By preventing selection, REFORMINLIQUID makes an important contribution to the horse's mineral supplementation. In addition to being an excellent supplement to the basic feed, REFORMINLIQUID contains all vitamins and trace elements in concentrations that cover requirements.

## Original REFORMINSTIXX

The healthy reward.

REFORMINST/XX has been developed and tested by scientists in collaboration with experienced practitioners and is an ideal alternative to conventional mineral and vitamin supplements.

The grain- and molasses-free REFORMINST/XX is a wonderful combination of treat and mineral supplement. Provide your horse with all the important trace elements and vitamins and also reward it.

In addition to being an excellent supplement to the basic feed, REFORMINST/XX contains all vitamins and trace elements in concentrations that cover requirements.

The composition of the REFORMINST/XX batches is continuously checked. The vitality and performance of horses depend to a large extent on their being supplied with the right amount of nutrients. REFORMINST/XX therefore makes an important contribution to the horse's mineral supplementation and should not be missing from its daily ration.

# Höveler VITALITY

- MAGNESIUM
- VITAMIN E & B12
- ADMR COMPLIANT

- IMMUNE SYSTEM
- VITAMIN E & B
- INCREASED NEEDS

- MUSCULATURE
- VITAMIN E & SELENIUM
- ANTIOXIDANTS

## Höveler MAGNESIUM PLUS SUPPLEMENTARY FEED FOR HORSES

Höveler MAGNESIUM PLUS contains a high proportion of magnesium, which is involved in numerous enzyme activities in nerve and muscle metabolism. Vitamin B12 is essential not only for cell division but also for nerve tissue. PLUS also contains vitamins E and C as valuable antioxidants.

### FEEDING RECOMMENDATION

per animal and day as required

Foals/ponies:	30 g
Yearlings/small horses:	50 g
Leisure horses (600 kg):	75 g
Sport horses (600 kg):	75-100 g

### COMPOSITION

Magnesium oxide, dextrose, sucrose, wheat flour, magnesium fumarate, refined sunflower oil

### ANALYTICAL CONSTITUENTS

2.0 % crude protein, 2.2 % crude fat, 0.7 % crude fibre, 25.7 % crude ash, 0.2 % calcium, 0.02 % phosphorus, 0.0 % sodium, 15.0 % magnesium

### ERNÄHRUNGSPHYSIOLOGISCHE ZUSÄTZ

PER KG

8,800 mg vitamin E (3a700), 9,600 mg vitamin C (3a300), 4,000 µg vitamin B12, 4,000 mg manganese as manganese (II) oxide (3b502), 5,000 mg zinc as zinc oxide (3b603)

## Höveler VITAMIN PLUS SUPPLEMENTARY FEED FOR HORSES

The vitamins contained in VITAMIN PLUS (A, E, C and B vitamins) prevent nutritional vitamin deficiencies, especially during periods of stress (competitions, winter time, re-stabling) and promote the immune system and thus the health and fertility of foals, sport and breeding horses.

### FEEDING RECOMMENDATION

per animal and day as required

Foals/ponies:	30 g
Yearlings/small horses:	50 g
Leisure horses (600 kg):	75 g
Sport horses (600 kg):	75-100 g
Breeding horses (600 kg):	75-100 g

### COMPOSITION

Dextrose, sodium chloride

### ANALYTICAL CONSTITUENTS

5.3 % crude ash, 2.0 % sodium, 0.1 % calcium

### NUTRITIONAL ADDITIVES

PER KG

200,000 iE vitamin A (3a672a), 7,000 mg vitamin E (3a700), 14,000 mg vitamin C (3a300), 1,000 mg vitamin B1 (3a821), 3,600 mg vitamin B2, 700 mg vitamin B6 pyridoxine hydrochloride (3a831), 3,000 µg vitamin B12 as cyanobalamin, 8,000 mg niacin (3a314), 100 mg folic acid (3a316), 2,000 mg calcium D-pantothenate (3a841)

## Höveler E-VITA PLUS SUPPLEMENTARY FEED FOR HORSES

Vitamin E and selenium are known for their antioxidant effect throughout the muscles. E-VITA PLUS supports relaxed muscle activity and helps every muscle cell to work efficiently. Can be used for both leisure and sport horses.

### FEEDING RECOMMENDATION

per animal and day as required

Leisure horses (600 kg):	10 g
Sport horses (600 kg):	20 g

### COMPOSITION

Dextrose, sucrose, wheat flour, magnesium fumarate, refined sunflower oil

### ANALYTICAL CONSTITUENTS

2.1 % crude protein, 0.7 % crude fibre, 1.7 % crude ash, 0.7 % crude fat, 0.2 % calcium, 0.02 % phosphorus, 0.7 % magnesium

### NUTRITIONAL ADDITIVES

PER KG

50,000 mg vitamin E (3a700), 5,000 mg vitamin C (3a300), 25 mg selenium as sodium selenite (3b801)

# Höveler VITALITY

- COMPENSATION
- SWEAT LOSS
- VITAMIN E

- HOOVES & COAT
- ORGANIC ZINC
- BIOTIN

- OMEGA-3 FATTY ACIDS
- COLD PRESSED
- DIGESTION

## Höveler ELEKTROLYTE PLUS SUPPLEMENTARY FEED FOR HORSES

During strenuous exercise and the resulting increased sweat production, the horse also loses important minerals and vitamins through sweat. Höveler Elektrolyte Plus contains important electrolytes, vitamins and glucose and thus ensures that reserves are replenished quickly after strenuous exercise. As a PLUS, vitamin E and C are included as valuable antioxidants.

### FEEDING RECOMMENDATION

per animal and day as required

Foals/ponies:	30 g
Yearlings/small horses:	50 g
Leisure horses (600 kg):	75 g
Sport horses (600 kg):	75-100 g

### COMPOSITION

Sodium chloride, dextrose, lactose, potassium chloride, sodium citrate, magnesium fumarate

### ANALYTICAL CONSTITUENTS

38 % crude ash, 0.10 % calcium, 0.55 % magnesium, 14.2 % sodium

### NUTRITIONAL ADDITIVES

PER KG  
4,000 mg vitamin E (3a700), 5,000 mg vitamin C (3a300)

## Höveler BIOTIN PLUS SUPPLEMENTARY FEED FOR HORSES

Poor horn quality and a dull coat are indications of an inadequate supply of biotin, zinc and the sulphur-containing amino acid methionine. Höveler BIOTIN PLUS supplements these nutrients in a targeted manner and closes supply gaps that can occur in the daily ration. The high-quality composition requires a low feed quantity.

### FEEDING RECOMMENDATION

per animal and day as required

Ponies:	5-10 g
Small horses:	10-20 g
Leisure horses (600 kg):	15-30 g

### COMPOSITION

Dextrose, wheat flour, sucrose, sodium chloride, calcium carbonate, refined sunflower oil

### ANALYTICAL CONSTITUENTS

2.9 % crude protein, 0.6 % crude fibre, 15.0 % crude ash, 0.7 % crude fat, 2.0 % calcium, 0.02 % phosphorus, 2.0 % sodium, 0.2 % magnesium

### NUTRITIONAL ADDITIVES

PER KG  
1,000,000 mcg biotin (3a880), 20,000 mg DL-methionine (technically pure) (3c301), 2,000 mg vitamin C (3a300), 5,000 mg zinc as glycine zinc chelate, hydrate (3b607), 5,000 mg zinc as zinc oxide (3b603)

## Höveler LEINÖL SUPPLEMENTARY FEED FOR HORSES

Linseed oil has a high proportion of omega-3 fatty acids. Omega-3 fatty acids are involved in many important metabolic processes, strengthen the immune system and support the coat and hooves. Höveler LEINÖL is a cold-pressed, pure natural product.

### FEEDING RECOMMENDATION

per animal and day as required

per 100 kg body weight	5-25 ml
------------------------	---------

The feeding of oils should be introduced slowly and increased until the desired amount is reached.

### COMPOSITION

100 % linseed oil

**FEED COMPONENTS**

## Original Prachthafer

Oats in a class of their own.

For our Höveler Original Prachthafer we only use selected foreign oats that have been rolled and double-cleaned. Prachthafer consists of approx. 30 % high-quality black oats.

This tried and tested oat mixture is characterised by its high starch digestibility in the horse's small intestine (> 80 %). Another major advantage is the high proportion of unsaturated fatty acids and mucilage. Both together have a very positive influence on digestive processes.

Crushed oats are particularly beneficial for hasty eaters, horses with underdeveloped teeth (young horses up to 3.5 years of age) or horses with damaged teeth.

To improve the hygienic quality, Prachthafer is double-cleaned. The natural microbial population and possible health risks for the horse can thus be significantly reduced.

### BASIS

### FEED COMPONENTS

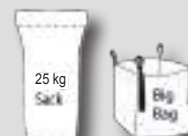

- 30 % BLACK OATS
- ROLLED OAT MIXTURE
- EASILY DIGESTIBLE
- LOW DUST

Feeding recommendation  
Original Prachthafer

Can be used as a normal oat manger feed ration.

Daily hay ration: 1.5 kg per 100 kg body weight

### Packaging units:

### Höveler measuring unit:

670 g

4808362

#### TIP!

As oats are not additionally vitaminised and mineralised, we recommend combining them with our Original REFORMINPLUS mineral feed.

**Original Hafer**  
Oats are the most traditional and proven grain in horse feed.

**Original Haferflocken**  
Oat flakes are broken down oat grains and are therefore even easier to digest.

**Original Leinsaat micronised/rolled**  
This linseed does not need to be boiled and can therefore be fed directly.

**Original Leinsaat**  
Due to its high mucilage content, linseed is ideal for horses with sensitive digestive tracts.

**Original MaisCobs**  
As the whole maize plant is processed, maize cobs have a high energy content and a high crude fibre content.

**Original Maisflocken**  
Maize flakes are hydrothermally digested maize grains and are particularly suitable for heavy-fed horses.

**Original Skandi Hafer**  
The very heavy Skandi oats are a mixture of Swedish and Finnish yellow oats and are double-cleaned.

**Original Sojaschrot**  
Is used to supply high-quality proteins due to its favourable amino acid ratio.

**Original Walzhafer**  
Oats are the most traditional and proven grain in horse feed.

**Original Weizenkleie**  
Wheat bran is one of the main ingredients in the classic mash recipe. It supports the digestive tract.

**Original Luzerne Mix**  
The mixture of alfalfa, cut oats and linseed oil form an optimal mixture of structure and energy combined with a very good amino acid structure.
