Overview

Appreciate the look and feel of real wood with the shiplap-inspired Designer Series. Easily transform indoor spaces with a warm and inviting rustic or shabby-chic style. Perfect for accent walls, utility rooms, man caves, she-sheds and everything in between!

Water, scratch, and dent resistant, DURACLAD Designer Series wall and ceiling panels can be installed directly on studs, making them the ideal alternative to drywall. Featuring a multiwall structure, these PVC panels are tough, rigid, and built to last.

DURACLAD's interlocking tongue-and-groove design allows for fast installation and hidden fasteners for a smooth, hygienic finish. Inherently impervious to bacteria, mold & mildew, panels are low-maintenance and well suited for high moisture and high traffic areas.

duraclad.com
