

GroStik™

The GroStik™ utilises the sun's energy and the latest in graphite technology to safely electrify the soil surrounding your plants, rapidly increasing the growth rate and yield by as much as 50%! While also naturally deterring up to 99% of insects.

The GroStik™ can be used in direct or indirect light and can be reused time and time again, simply wipe the rods after each growth period and you're good to go!

HOW TO USE

STEP 1:

Insert the rods approximately 4 fingers or 3-4 inches from the base of the plant.

STEP 2:

Use the adjuster to angle the solar panel to the optimised light position.

STEP 3:

Water regularly or as per usual depending on each plants

For best results keep the soil moist and the solar panel clean

PATENT PENDING

DO NOT BEND RODS
