

Oso Easy En Fuego® Rose

FEATURES

Plant some fire with Oso Easy En Fuego® rose! Its large blooms are a super saturated blend of yellow, red, and orange. The amount of each color changes depending on the bloom's age. Opening flowers are more filled with red and yellow, while mature blooms are mostly orange. No matter the color, flowers are beautifully presented with super glossy dark green foliage as a backdrop.

Top reasons to grow Oso Easy En Fuego rose?

- Super saturated coloring
- Great performance in very hot and very cold climates
- No deadheading necessary

Continuous Bloom or Rebloomer

Disease Resistant

Long Blooming

Heat Tolerant

Deadheading Not Necessary

Attracts:

Bees

Butterflies

CHARACTERISTICS

Plant Type:

Shrub

Shrub Type:

Deciduous

Height Category:

Medium

Garden Height:

36 - 48 Inches 91cm - 1.2m

Spacing:

36 Inches 91cm

Spread:

36 Inches 91cm

Flower Colors:

Orange

Red

Yellow

Foliage Colors:

Green

Foliage Shade:

Green

Habit:

Mounded

Container Role:

Filler

PLANT NEEDS**Light Requirement:**

Sun

The optimum amount of sun or shade each plant needs to thrive: Full Sun (6+ hours), Part Sun (4-6 hours), Full Shade (up to 4 hours).

Maintenance Category:

Easy

Blooms On:

New Wood

Bloom Time:

Summer

Fall

Hardiness Zones:

4a, 4b, 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b, 9a, 9b

Water Category:

Average

Soil Fertility Requirement:

Average Soil

Fertile Soil

Soil PH Category:

Acidic Soil

Neutral Soil

Uses:

Border Plant

Container

Landscape

Mass Planting

Specimen or Focal Point

Maintenance Notes:

Oso Easy® roses are highly disease resistant. For best results, plant only in full sun (at least 6 hours daily) and ensure good air circulation by spacing plants properly. Landscape roses like the Oso Easy® series don't need any special kind of pruning: simply cut them back by about one-half their total height each early spring. This ensures that the new growth for the year comes from the bigger, healthier buds lower on the plant.

If desired, apply a granular fertilizer formulated for woody plants (like a rose fertilizer) in early spring, just as the ground has thawed. Deadheading is not recommended or required.
