

Basket of Jams

1.

2.

3.

Raspberry

PLANTING INSTRUCTIONS:

1. Dig a hole large enough to encompass the roots without bending or circling.
2. Set the plant crown (where top meets the roots) 1-2" deep, make sure 4-5" of the top shows above the soil surface.
3. Water thoroughly. Fertilize newly set plants 2-3 weeks after planting and again in early summer.

Strawberry

PLANTING INSTRUCTIONS:

1. Dig a hole large enough to encompass the roots without bending or circling.
2. Set the plant in place so the crown (part of the plant where the root meets the stem) is level with the soil surface.
3. Cover with soil to original soil surface. Apply 6" of mulch for root protection. Water thoroughly. Apply fertilizer after growth begins.

Blackberry

PLANTING INSTRUCTIONS:

1. Dig a hole large enough to encompass the roots without bending or circling.
2. Set the plant in place so the crown (part of the plant where the root meets the stem) is level with the soil surface.
3. Cover with soil to original soil surface. Water thoroughly. Fertilize at planting and again in late spring.

Blueberry

PLANTING INSTRUCTIONS:

1. Dig a hole large enough to encompass the roots without bending or circling.
2. Set the plant in place so the crown (where the roots meet the stem) is 1-2" below the soil surface.
3. Add generous amounts of peat but no fertilizer when planting. Cover with soil to the original soil surface and water thoroughly.
