CAPTURE MORE DETAIL

When it comes to capturing action in the wild, the FORCE-4K doesn't miss a moment. It gives you more of the intel that matters, with 48MP photos and ultra-high definition 4K videos with sound. With an extra-wide 66° field of view, you'll see more of the scene in every shot—more woods, more wildlife, fewer “almost got it” moments. The FORCE-4K is the reliable hunting tool that never rests, never complains, and always brings back the proof.

KEY FEATURES

LET SPYPOINT SCOUT FOR YOU: Get the intel you need to pattern wildlife and increase your chances of success with quality captures saved on your camera's SD card.

WIDER FIELD OF VIEW: The FORCE-4K's 66° field of view covers more ground with every shot. That means fewer blind spots and better context on game movement, behavior, and interactions.

4K VIDEOS WITH SOUND: Capture ultra-high definition videos with sound that deliver clear and detailed recordings.

HIGH-RESOLUTION PHOTOS: Opt for photos to get image quality that well surpasses this camera's price tag, and receive color captures during dusk and dawn, when the details matter most.

LCD VIEWING SCREEN: Easily configure settings and view media from the SD card on the camera's two-inch color LCD viewing screen.

NO PLANS OR COMMITMENTS: Invest in your passion without committing to the costs of data transmission plans or cellular equipment.

CUSTOMIZE YOUR SETTINGS: Fine-tune your scouting with features like 6-photo bursts in Multishot mode, photos at your preferred interval with Time-Lapse, and photos at your preferred interval as well as when the camera's detection sensor is triggered with Time-Lapse+.

CLEAR NIGHT PHOTOS: Night vision low-glow LEDs capture bright, crisp night footage without alerting wildlife.

TWO-YEAR WARRANTY: Enjoy peace of mind knowing that SPYPOINT's “Know You're Covered” guarantee protects your investment.
