

Wireless Cube Power Strip

hello@UncagedErgonomics.com | 240-583-0517

Electrical Safety Warnings

- **Electrical Rating:** Do not exceed the maximum electrical load of 13A, 1625W, 125V AC. Overloading may cause overheating, fire, or product failure.
- **Appliance Restrictions:** This product is intended for low-to-moderate power consumer electronics (computers, TVs, lamps, chargers, etc.). Do NOT use with high-current appliances such as space heaters, portable air conditioners, refrigerators, microwaves, or hair dryers.
- **Indoor Use Only:** For dry, indoor locations only. Do not use outdoors, in bathrooms, garages, or other damp/wet environments.
- **Heat & Ventilation:** Do not cover the unit or place it under rugs, furniture, bedding, or in enclosed areas where heat cannot dissipate. Keep away from heat sources and direct sunlight.
- **Wall & Fire Safety:** If you notice sparking, smoke, discoloration, unusual odor, or the unit becoming hot to the touch, immediately unplug and discontinue use.
- **No Daisy-Chaining:** Do not plug this unit into another power strip, surge protector, or extension cord. Use only with a properly grounded wall outlet.
- **Proper Connection:** Ensure plugs are fully inserted into outlets to prevent arcing or shock. Do not bind, coil, or pinch the power cord, which may cause overheating.
- **Inspection Before Use:** Do not use if the cord, plug, housing, or outlets are damaged, cracked, or loose. Inspect periodically.
- **Disassembly Prohibited:** Do not attempt to open, disassemble, repair, or modify the power strip. No user-serviceable parts inside.
- **Surge Protection Limits:** This device provides limited surge suppression. It will not protect against direct lightning strikes or sustained high-voltage events.
- **User Responsibility:** Misuse, exceeding electrical ratings, or failure to follow instructions may result in risk of fire, shock, or property damage. The manufacturer is not responsible for damages caused by improper use. User assumes all risks and responsibilities.
- **Liquid Hazard:** Do not expose this product to water, rain, spills, or moisture. Do not use near sinks, bathtubs, or wet surfaces. If liquid enters the product, unplug immediately and discontinue use.
- **Children & Pets:** This product is not a toy. Keep out of reach of children and pets. Do not allow children to plug or unplug devices or operate the ON/OFF switch.
- **Placement Safety:** Place the power strip on a stable, flat surface or mount securely using the provided mounting holes. Do not hang by the cord or place where it may fall, tip, or be pulled.
- **Overload Protection:** If the overload switch trips, unplug all connected devices and allow the unit to cool before resetting. Repeated tripping indicates overloading or misuse.
- **Not a Medical Device:** This product is not intended to diagnose, treat, cure, or prevent any medical condition.

Mounting Instructions:

1. Locate a mounting position within 9.8ft (3m) of a wall outlet.
2. Use the included marking sheet to mark the position of the mounting screws.
3. Drive screws or nails into the marked position with the heads protruding about 3-5 mm.
4. Mount the power strip on the screws. Once secured, plug in the power cord to the wall outlet.

Troubleshooting

STEP 1: When to Reset

The USB Power Strip will automatically shut down if the AC Outlets are overloaded. When this happens, disconnect all attached devices and reset the overload protector on the base. Be careful not to overload the Power Strip again.

STEP 2: Why Are The USB Ports Not Working?

Possible Reasons:

(1) The power cable is not completely plugged into the AC wall outlet.

Solution: Reconnect the power cable to the AC wall outlet.

(2) The ON/OFF switch is not turned "ON".

Solution: Press the ON/OFF switch to the "ON" position.

(3) The total current of the attached devices exceeds 4.2A or a single port exceeds 2.4A

Solution: Disconnect the overloading electronic devices and relocate them to the AC Outlets with appropriate adapters. Overloading the USB Ports will not trigger the overload protector instead, overloading the USB ports will cause them to automatically shut down and they will be available again when the overloading devices are unplugged.

Usage and Settings

Please read these instructions carefully before using and keep it for future use. Only use this product as directed to avoid injury or risk.

1. AC Outlets
2. USB-A Charging Ports
3. LED Power Indicator
4. USB-C Charging Port
5. LED Protected Indicator
6. LED Grounded Indicator
7. ON/OFF and Overload Switch

The phone or tablet may increase in temperature during wireless charging. This is normal. It is recommended to wirelessly charge your phone or tablet without a case on the device.

Technical Specifications

Model	Wireless Cube	
Interface	4 AC Outlets + 2 USB-A + 2 USB-C	
Input	110 - 125V~, 50/60 Hz	
Output	1625W, 13A, 125V AC	
USB-A Output	5V 2.4A (Total)	
USB-C Output	20 W (5V=3A, 9V=2.22A, 12V=1.67A)	
Wireless Charging	15W	
Surge Protection	320 Joules	
Material	Plastic: ABS+PC Blend Cable Core: Pure Copper	
Dimensions	79 X 79 X 93 mm	
Operating Environment	Temperature	Operating: -10°C to +25°C Storage: -20°C to +75°C
	Altitude	Operating: 2000m Storage: to 2000m

Question and Answers for Wireless Charging

Q. Can wireless charging be turned off? Can the top platform still be used as a holder to place the phone/tablet while charging from the USB port?

A: No, you cannot turn off wireless charging manually. When a device is connected to the USB port and placed on the platform at the same time, the wireless charging function will automatically turn off, and the platform can be used as a holder.

Q. Can I put a non-wireless-charging phone on the platform? Will it damage my phone?

A: Yes, you can place a non-wireless-charging phone on the platform, and it will not cause any damage.

Q. My phone supports 10W wireless charging. Can I use it on this wireless charger?

A: Yes, but it will charge slowly. It is recommended to use the USB port for charging instead.

SAFETY AND LEGAL INFORMATION

Children and Misuse Warnings

- Not a toy. Keep out of reach of children and pets. Do not allow children to plug or unplug devices or operate switches.
- Do not disassemble or modify the product. No user-serviceable parts.

Important Legal Disclaimers

- Not a medical device. This product is not intended to diagnose, treat, cure, or prevent any medical condition.
- Uncaged Ergonomics LLC assumes no liability for injury, property damage, or loss resulting from misuse, overloading, improper placement, modification, or failure to follow instructions.
- Use of this product constitutes acceptance of all safety instructions, warnings, and limitations of liability described herein.
