

CARING FOR YOUR FIELD & STREAM TSULA BLIND

How to get the maximum performance from your Field & Stream blind

Make Sure Your Blind is Level

However you choose to elevate your blind or if it is used at ground level it is important to make sure it is level. For the optimal performance of the windows and door latch systems having the blind level will reduce added torque to these areas. Especially in wide ranges of temperature change throughout the seasons when the plastic shell expands/contracts.

Latch the Windows

During transit and when not in use make sure all window latches are engaged on the window frame. This creates a tight seal and minimizes stress on the windows while moving the blind.

Remove the Window Shades During the Offseason

When the hunting season is over it is best to remove any window shades for the off season. This helps reduce the impact of harsh UV rays to the shades themselves as well as window components.

Floor Mats

Roll up or stack floor mats during the off season to allow the blind to dry out. Moisture / humidity can build up over time and can become trapped under the floor mat. Removing or stacking the mat sections to the side will allow the blind to dry out. Use of portable heaters can also increase condensation inside as well.

Check Hardware

Before use and transit, it is best to check all frame and tower assembly bolts to make sure they are tight. Forklift pockets should be checked regularly and especially before moving or adjusting the blind.

Normal wear and tear, including dents, slight warping, scratches, discoloration, fading, graphics that lose adhesion, and improper installation are not covered under this warranty. Plastic will inherently expand and contract with temperature changes so some plastic movement around windows and door openings is normal. Loss of parts or components removed from the product is not covered under the terms of this warranty. Grizzly is not responsible for incidental or consequential damage resulting from any malfunction. Grizzly reserves the right to change products and designs without incurring any obligations to incorporate such changes into already completed products, or those in the possession of dealers or consumers. Blinds repaired or replaced under this warranty may or may not incorporate these changes. Please carefully review the care instructions manual for proper use and care of your Grizzly product. Damaged products must be returned directly to Grizzly Coolers, freight prepaid at customer's expense. Please include a copy of original sales receipt and the return authorization number with the product.

GRIZZLY TSULA BLIND LIMITED LIFETIME WARRANTY

Grizzly Coolers, LLC warrants Field & Stream Blinds to be free from manufacturers defects in material or workmanship under normal use and service for a lifetime from the date of original purchase for the original purchaser only. Accessories, windows, and components other than the rotomolded shell are not covered under this warranty. This warranty is your exclusive warranty and there are no warranties that extend beyond the description warranted here. If warranty applies, Grizzly shall either repair the product/component or provide you with a replacement product/component if it proves defective under the terms of this warranty at sole discretion of Grizzly Coolers.

To be eligible for product warranty, original owner must complete the product warranty registration form online at www.grizzlycoolers.com within 30 days of date of purchase. Owner must present original proof of purchase to obtain warranty service. The warranty is not transferable. Dealers, service centers or retail stores do not have the right to change the terms and conditions of the warranty.

This warranty is not valid if the product or components have been:

- Damaged through abuse, misuse or neglect.
- Damaged in an accident.
- Unreasonably used or used for any purpose for which it was not intended.
- Repaired or altered in any way from its original configuration.
- Damaged due to any act of nature (ie: high winds, storms, floods, or damage caused by animals etc.).
