CONCRETE ARMOR SEALER™

SAVE YOUR CONCRETE DRIVEWAY, SIDEWALK, DECK, AND MORE

Exposure to mildew, mold, freeze-thaw cycles, acid rain, and salt can leave concrete stained and worn. Concrete Armor Sealer™ shields your surfaces to help prevent damage and avoid expensive repairs.

Concrete Armor Sealer™ forms an internal barrier of cross-linked, insoluble methyl-silicone that fuses with porous substrates of broom-finished concrete. It also reduces UV damage and deterioration.

In addition to concrete, Concrete Armor Sealer™ is suitable for unsealed masonry, stucco, natural and artificial wood, mortar, grout, bluestone, and flagstone—enhancing both appearance and long-term durability.
