

RESHARPEN STUMP GRINDER TEETH, CHIPPER BLADES AND INDUSTRIAL MOWER BLADES

# IN THE FIELD. IN THE SHOP. ANYWHERE.

## STUMP GRINDER TEETH SHARPENING TOOLS

### SMALL DIAMETER

An ideal tool for teeth with smaller carbide cutting surfaces and tighter pockets including Greenteeth, Rayco, Vermeer S-Pro and similar designs.

- ✓ Sharpen cutting edge quickly
- ✓ Fast material removal
- ✓ Save time and costs by reusing instead of replacing
- ✓ Sharpen teeth right on the equipment

### LARGE DIAMETER

Built for teeth with larger carbide cutting surfaces. This tool is a good match for Vermeer Yellow Jacket and Bandit-style teeth, in addition to larger carbide hammer and planer teeth.

- ✓ Restore cutting performance
- ✓ Larger diameter with more diamond cutting media
- ✓ Sharpen teeth quickly
- ✓ Sharpen teeth right on the equipment

## CHIPPER BLADE SHARPENING TOOLS

### TOP-FACE ABRASIVE

Designed for **horizontal drum-style chippers**, this CBN coated tool makes quick work of sharpening your chipper blades cutting edge, maintaining efficiently and significantly extending the time between professional sharpenings.

- ✓ Minimal material removal to restore edge
- ✓ No need for knife adjustments
- ✓ Sharpen blades right on the equipment
- ✓ Fast & easy process - takes under a minute

### BACK-FACE ABRASIVE

Best for **vertical disc-style chippers**, this CBN coated tool is designed to quickly access and sharpen the blade's cutting edge from the back side, resulting in improved cutting efficiency, and providing significantly more time between professional sharpenings.

- ✓ Minimal material removal to restore edge
- ✓ No need for knife adjustments
- ✓ Sharpen blades right on the equipment
- ✓ Fast & easy process - takes under a minute

## INDUSTRIAL MOWER BLADE SHARPENING TOOLS

### TOP-FACE ABRASIVE

Designed for ease of use, this tool provides a simple solution for sharpening industrial mower blades.

- ✓ Maintains blade's quality and efficiency
- ✓ Fast & simple routine sharpenings

### BACK-FACE ABRASIVE

Designed for job site use, this tool allows for efficient blade repair sharpening without the need to remove the blade from the machine.

- ✓ Damaged blades, restored in seconds
- ✓ Maintain cut quality and consistency

Most products carry a 1 year warranty. Check with the dealer you purchased from for updated information.

ArborEdge Sharpening Tools keep your stump grinder teeth, chipper and mower blades cutting like they should, without forcing the cut, burning more fuel, or losing hours on the job due to dull cutting edges. With quick touch-ups on the job or in the shop, you can extend the life of your teeth and blades between professional sharpenings significantly reducing replacement costs and easing strain on your equipment.
