**RECYCLABLE
FROM PRODUCT
TO PACKAGING.
REDUCE YOUR
FOOTPRINT!**

At MARTINS, we firmly believe that every gesture counts in preserving our planet. By investing in Magnum+ beads, you're not only optimizing the efficiency of your tires, you're also contributing to a healthier environment.

MARTINS Magnum+ bead packaging is an integral part of our commitment to environmental sustainability. Aware of the crucial importance of preserving our planet, we have designed fully recyclable, environmentally friendly packaging to accompany our innovative products.

Cartons and buckets go into the recycling bin.

Recyclable outer bag.

The individual bag containing the Magnum+ beads decomposes entirely on its own inside the tire.

TEMPERED GLASS

Vacuum up the beads, weigh them to get the right weight and reuse them for other tires as many times as you like! What's more, our beads are environmentally friendly because they contain NO silica-based coatings, unlike other glass beads.
