SPOTTED LANTERNFLY ELIMINATOR

Ready-to-Spray

TRUSTED SINCE 1926
BONIDE®

Made with botanical extracts and essential oils, this fast-acting formula kills spotted lanternflies on contact, including nymphs and adults. It works on all active stages of spotted lanternfly[‡] and starts killing in seconds ^{**}. Developed and tested by entomologists, this product also kills other listed pests.

With a pleasant scent, this non-staining[^] and non-slip[^] formula is safe to use around people, pets, plants and bees[^].

[^]When used as directed ^{**}springtails, earwigs [‡]excluding eggs

PRECAUTIONARY STATEMENTS

May cause eye or skin irritation. Avoid contact with eyes, skin and clothing. May cause an allergic skin reaction. Thoroughly wash face, hands and any exposed skin after handling. Do not eat, drink, or smoke when using this product. Take off contaminated clothing and wash clothing before reuse. Do not apply directly to water. Do not contaminate water when disposing of equipment washwater or rinsate. Do not use or store near heat or open flame. Store only in the original container. If swallowed, do not induce vomiting. Rinse mouth and seek medical attention if symptoms occur.

FIRST AID

If in eyes:	• Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
If on skin or on clothing:	• Wash exposed area thoroughly with soap and water. Call a physician if irritation persists.
If swallowed:	• Clean mouth with water and drink plenty of water afterwards. • Do not give anything by mouth to an unconscious person. • Do not induce vomiting. Call a physician.

HOTLINE NUMBER

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact SafetyCall® (866) 897-8050 for emergency medical treatment information.

PRODUCT AND PEST DESCRIPTION

Captain Jack's Spotted Lanternfly Eliminator is a plant-based insect killer formulated and tested by entomologists to quickly kill spotted lanternfly and other listed pests around homes, patios, decks, walkways, ornamental and fruit trees, shrubs, vines, gardens, landscaped areas, and structures including but not limited to barns, sheds, detached garages, fences, pergolas, gazebos, docks, pathways, animal housing (including but not limited to coops and dog houses), storage buildings, and other outdoor structures.

Spotted lanternflies are an invasive species rapidly spreading across the United States. Nymphs and adults attack plants including Tree of Heaven and multiple other landscape trees, shrubs, vines and vegetation while creating large, visible infestations around homes and outdoor areas. Captain Jack's Spotted Lanternfly Eliminator kills both adult and nymph spotted lanternflies.

TARGET PESTS

This product will kill the following listed pests:	
Ants	Pillbugs
Beetles (including lady beetles)	Spotted lanternfly
Crickets	Springtails
Earwigs	Stink bugs
Millipedes	

DIRECTIONS FOR USE

Shake well before use. Apply directly to pests or areas where you may see pests. Do not apply when bees or other pollinators are actively foraging in the treatment area. Wait until they have left the area before beginning application.

Hose-end Sprayer Directions

1. Connect sprayer to garden hose. Make sure the dial indicator is in the OFF position.
2. Turn on water at faucet. Extend hose to the farthest treatment area and work back toward the water source.
3. To begin spraying: Hold container upright and point nozzle toward the area to be treated. Bend the safety tab back and turn dial clockwise to the ON position. Water will automatically mix with product at the proper dilution.
4. Spray evenly over the treatment area as directed below. Be sure to directly spray all target insects you see.
5. To stop spraying: Bend safety tab back and turn dial counterclockwise to OFF.
6. Turn off water. Relieve pressure by turning dial briefly to water, then return to OFF.
7. Disconnect sprayer from hose after use.

WHERE TO APPLY

Spotted lanternfly on outside surfaces of buildings:

For best results, spray pests directly and when they first appear. Make application when pest populations are low to prevent them from increasing to damaging levels. Re-treat every 5-7 days or as needed, or when pests are present. For pests including ants, beetles (including lady beetles), crickets, earwigs, millipedes, pillbugs, springtails and stink bugs, removing excess or old mulch and trimming landscaping that touches the structure or building or house will help reduce places where pests live and breed or gain entry to the structure or house.

Spotted lanternfly on foliage and bark of trees and landscaping:

Apply spray evenly to bark, trunks, and leaves where lanternflies are resting or feeding. Spray to uniformly and evenly cover upper and lower leaf surfaces, stems, and branches until dripping or wet. Focus on trunks and lower branches where adult insects congregate or form large groups. Spray all visible lanternflies directly. Do not apply to plants that are stressed from heat or drought. Avoid over-application on flowering plants as this may cause spotting or speckling of blooms. If the temperature is expected to exceed 85°F, spray in the early morning or late afternoon when it is cooler.

WHERE TO APPLY CON'T

Outdoor use for other listed pests:

For best results, spray pests directly and when they first appear. Make applications when pest populations are low to prevent them from increasing to damaging levels. Re-treat every 5-7 days or as needed. For pests including ants, beetles (including lady beetles), crickets, earwigs, millipedes, pillbugs, springtails and stink bugs, removing excess or old mulch and trimming landscaping that touches the structure or house will help reduce places where pests live and breed or gain entry to the structure or house.

Cleaning of residue on outdoor surfaces:

Although residues are unlikely, for any surfaces not harmed by water a mild soap and water solution may be used to remove residues from outdoor surfaces. A product like Simple Green® All Purpose Cleaner † can also be used. Always follow use directions for any soap or cleaning products.

STORAGE AND DISPOSAL

Store in the original container in a cool, dry place away from direct sunlight, and do not reuse or refill the container. If empty, recycle where available or dispose of in the trash; if partially filled, contact your local waste disposal authority for proper handling.
