

FLEX TAPE® MINI STRIPS

TECHNICAL DATA SHEET

DESCRIPTION

Flex Tape® Mini Strips are convenience-sized, rubberized waterproof strips that patch, bond, seal, and repair virtually everything! Perfect for fixing small cracks, holes, and leaks, securing surfaces like lids, trim, and panels, and handling general repairs around the home, garage, or outdoors. Made with the same super strong, flexible backing as original Flex Tape, these pre-cut strips conform to shapes and surfaces to create an airtight, durable seal. Use wet or dry, hot or cold—even underwater!

FEATURES

- Super strong & flexible.
- Instant grab adhesive.
- Thick rubberized backing.
- 100% waterproof, even works underwater.
- Adheres to most surfaces.
- UV resistant & VOC-free.
- For indoor & outdoor use.
- No cutting, just peel and stick.

COMMON APPLICATIONS

Storage bins, buckets, gutters, RV trim, outdoor gear, tents, toolboxes, building materials, automotive interiors, furniture, DIY projects.

COMMON BONDING SUBSTRATES

PVC, acrylic, aluminum, steel, copper, metal, wood, glass, rubber, fiberglass, ceramic, porcelain, tile, vinyl, stone, cement, concrete, drywall, plastic trim, many plastics**.

TEMPERATURES

- Storage: 60°F (15°C) and 100°F (38°C)
- Application: 20°F (-6°C) to 120°F (49°C)
- Withstands: -70°F (-57°C) to 200°F (93°C)

SIZE AND COLOR

- 1 in x 3 in clear tape strips, contains 6 individual strips

DISCLAIMERS & SAFETY WARNING

* Certain fabrics—such as canvas, nylon, polyester, synthetics, cotton, and others—may require up to 24 hours to reach maximum hold.

** Flex Tape's adhesive may resist bonding to plasticized materials, siliconized, greasy, oily, dirty, or porous surfaces, as well as waterproof or water-repellent materials. Bond strength increases with time and pressure. Not recommended for pressurized or structural repairs. For temporary use only. Always test before use.

USAGE INSTRUCTIONS

- 1. Peel:** Remove the backing to expose adhesive.
- 2. Stick:** Apply firmly to a clean surface. Using your fingers, a plastic squeegee, or roller, press down firmly and remove any air pockets. Continue pressing firmly for maximum adhesion.
- 3. Seal:** Flex Tape Mini Strips create a super strong, waterproof seal. Once applied, Flex Tape Mini Strips cannot be repositioned. Full adhesion may take up to 24 hours*.

RESTRICTIONS

- Not designed to withstand extreme heat, pressure, or harsh chemicals.
- Do not use to seal gas/oil tanks (flammable materials).
- Not tested for safe use with plants & animals.
- Do not use on potable water containers.
- Not tested for food safety.
- Do not use on radiator hoses.
- Do not use on tires.
- Not designed for underfoot applications.
- Flex Tape may not bond to all hoses.
