DECORATIVE LOG SET FOR LINEAR FIREPLACE

INSTALLATION INSTRUCTIONS

Decorative Logs are designed to add additional realism to the look of your fireplace. These pieces are an even greater addition to improve the overall appearance of your fireplace.

Instructions:

1) Turn off the fireplace and allow the area to cool before adding decorative logs.
2) Carefully place the logs evenly on the floor of your fireplace.
3) Keep decorative logs clear of any air openings in the fireplace floor.
4) Decorative Logs may be arranged in any desired position to create your preferred appearance. However, do not place them in a way that interferes with the flame, rest against or over the burner, or makes contact with the glass barrier panels.

⚠ WARNING: Do not place the log pieces into, over or on the fireplace burner or operating controls. The fireplace has been tested to the appropriate agency regulations for safe operation and any additional media added, that obstructs the burner or impinges upon the flame, will result in poor air quality conditions or sooting.

⚠ WARNING: The fireplace and surrounding media (glass, decorative rocks, logs - if used) may become very hot when operating. Keep children and adults away from hot surfaces to avoid burns or clothing ignition.

Refer to your fireplace's original product manual for operation instructions. Contact a qualified installer, service agent, or local gas supplier if you have questions about operating your fireplace. If you have any questions see your product's Owner's Manual for Customer Service info.
