Chicken Run
Assembly Guide

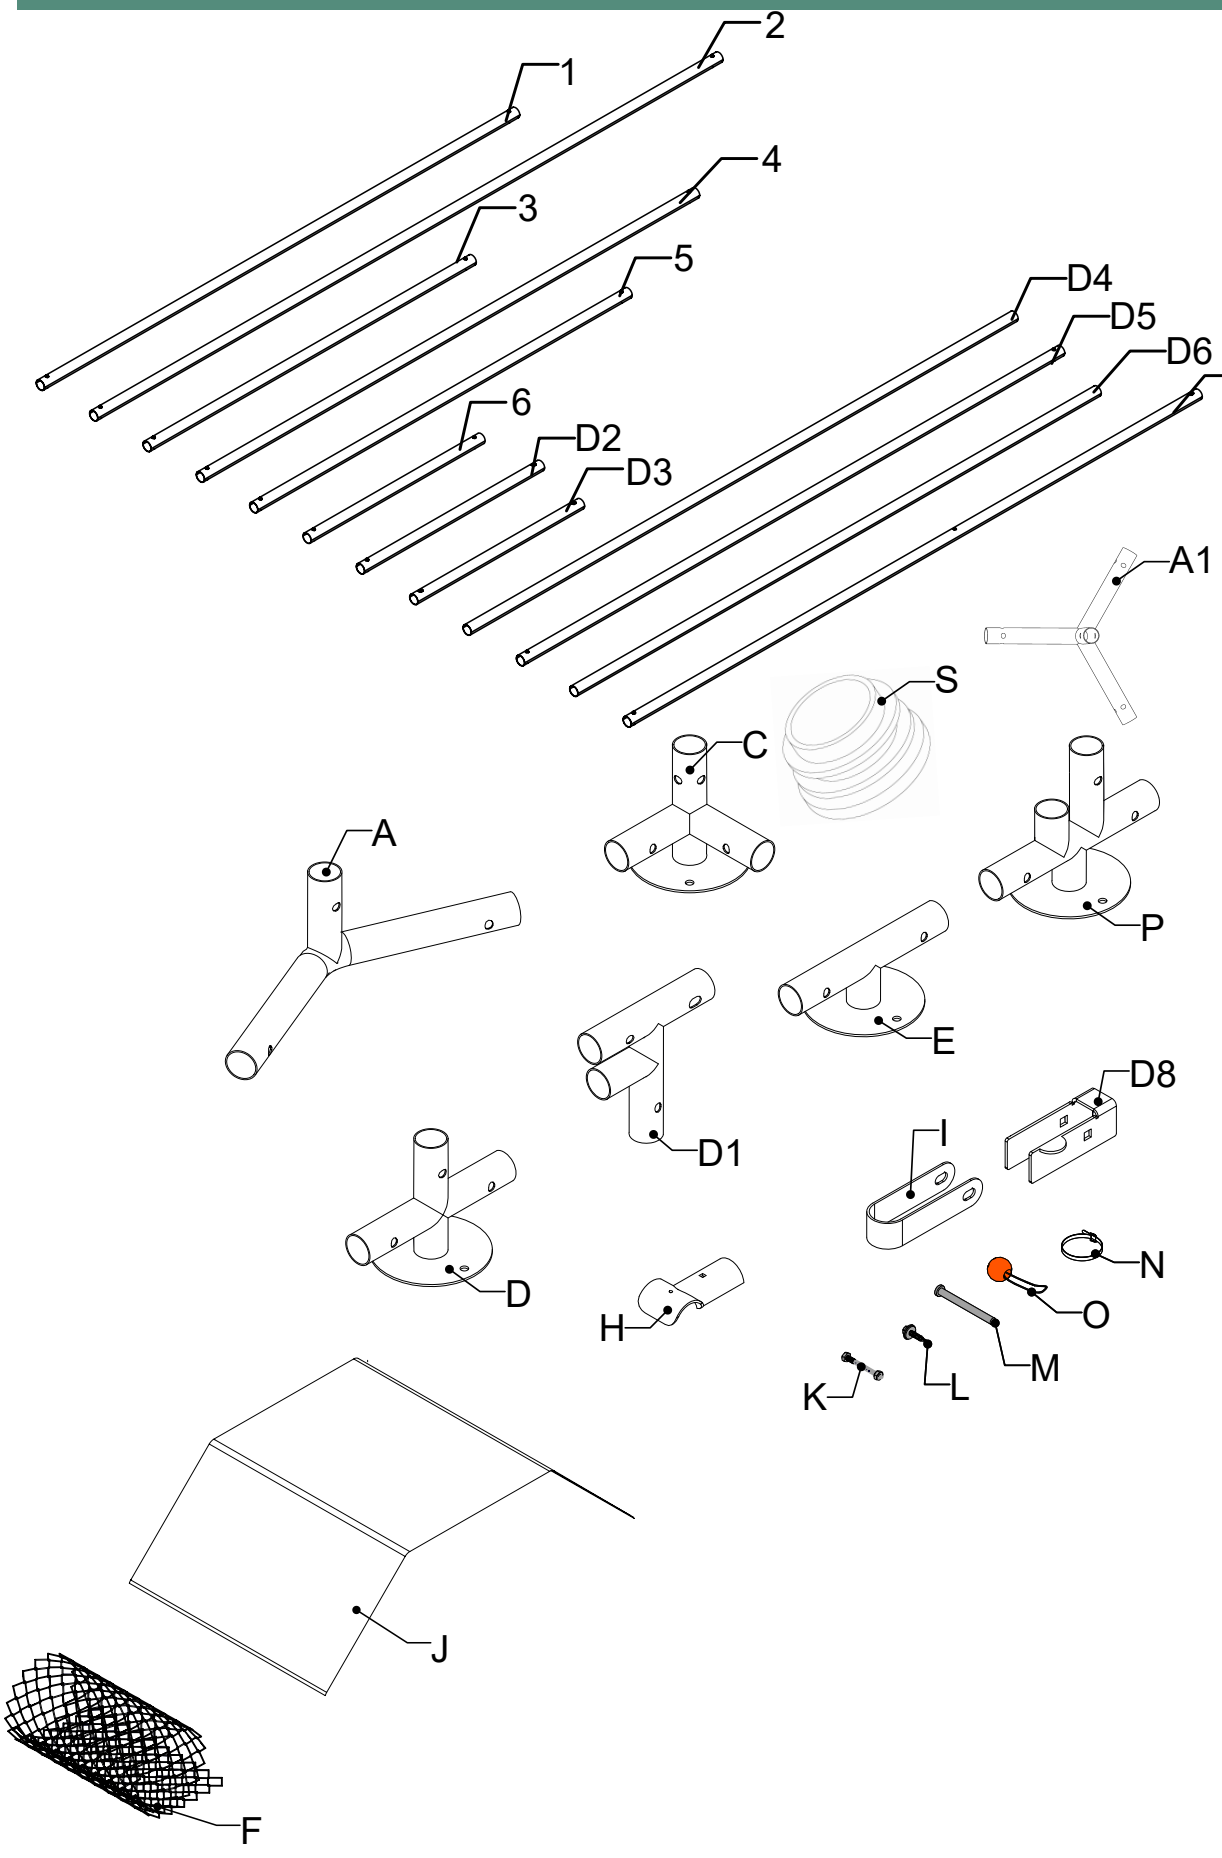

SAFETY

- Read all the safety information and instructions.
- Make sure you have all the parts before the assembling
- Do not assemble the chicken run on a stormy day. It will be damaged.
- Always wear work gloves, long sleeves, and safety goggles when assembling.
- Keep children and pets away from the assembly site.
- When using a ladder, make sure the ground is stable enough to hold the ladder.
- Remove snow from the roof after each snowfall.
- Do not walk on the roof, even if you can.

P	2

Note

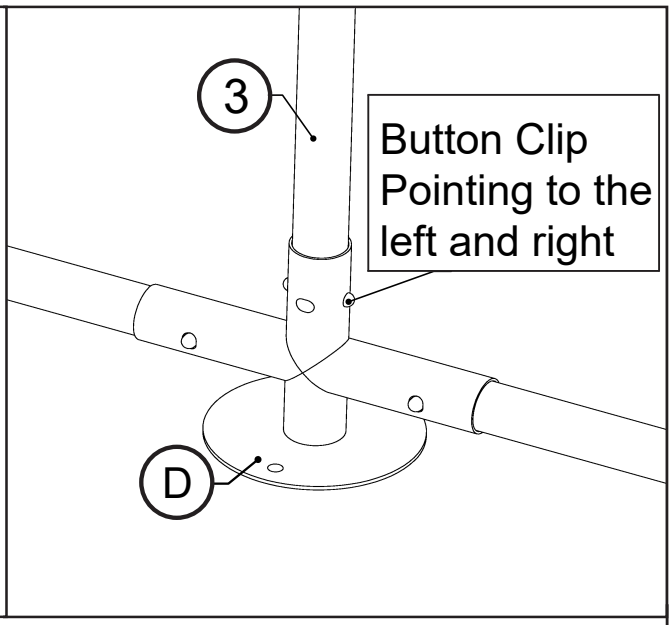

For this product, tubes and joints are connected using button clips. Button clips are already inserted inside tubes. When connecting, press the button clip and insert one tube into the joint. Forcing the tubes in might also work but you are risking damaging the Clip.

Pay attention to the orientation of Part P.

Part	Qty
3	6

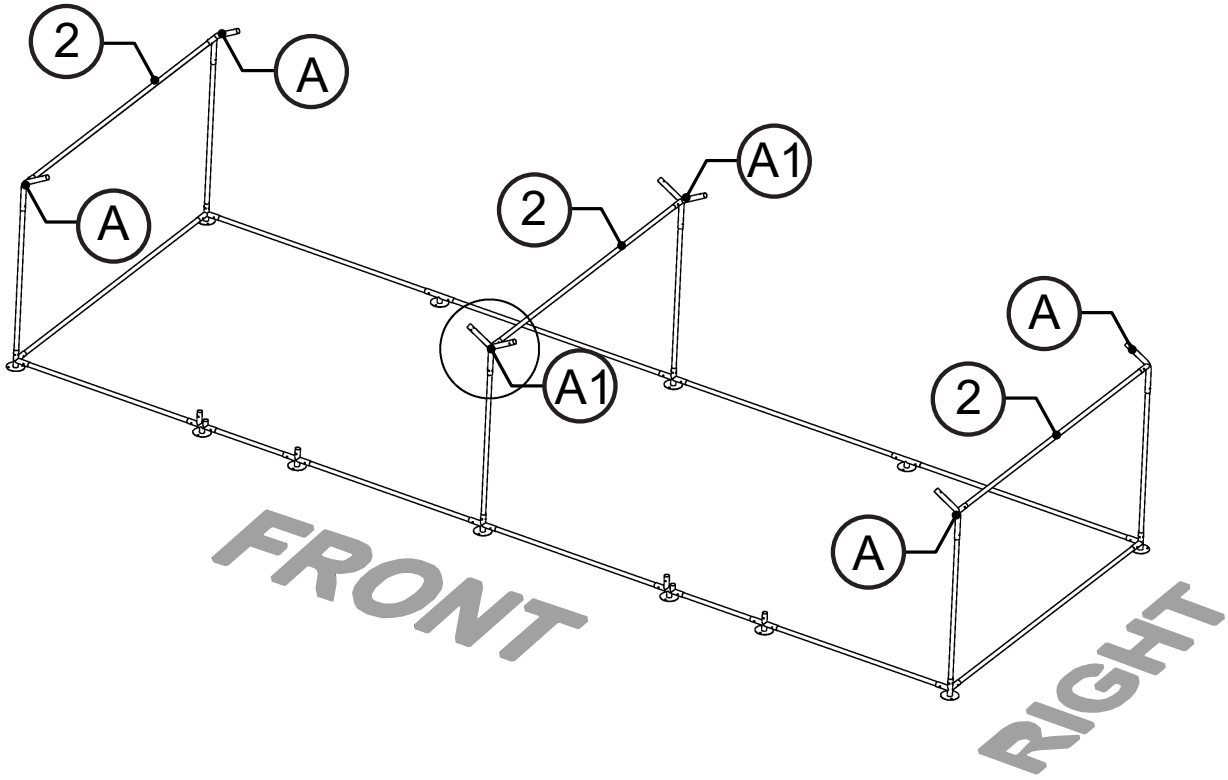

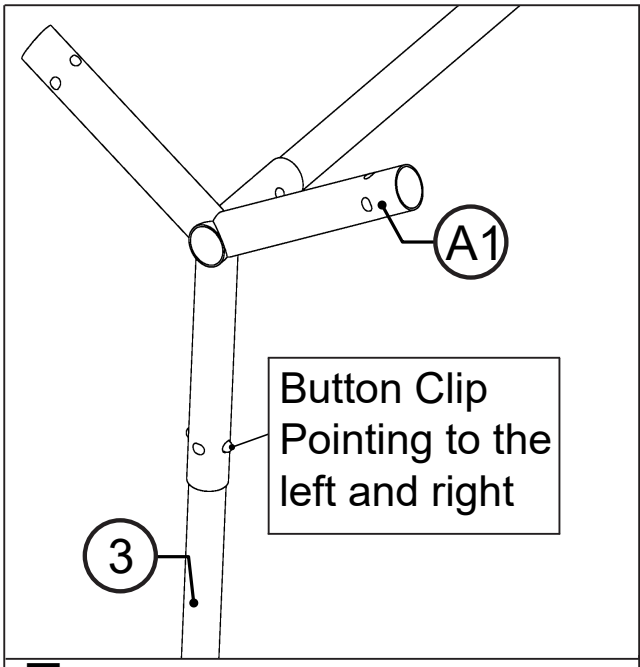

Note

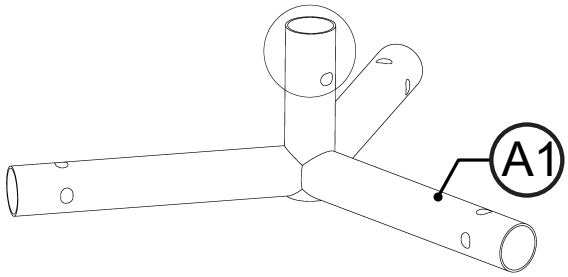

There are two pairs of holes on the vertical seams of components C and D. When connecting component 3 to components C and D, make sure the button clamps are facing the left and right sides, respectively, as shown in the diagram.

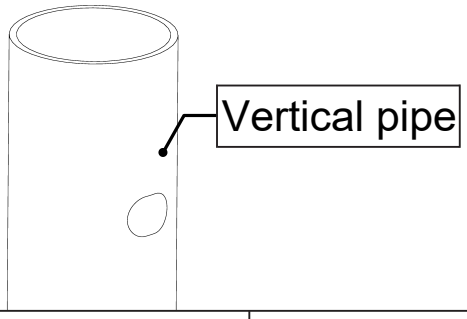

3

Part	Qty
A	4
2	3
A1	2

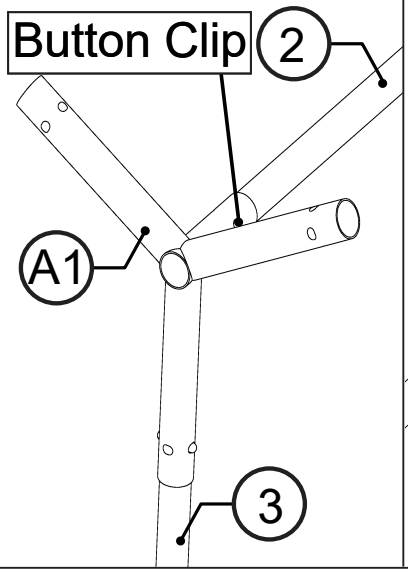

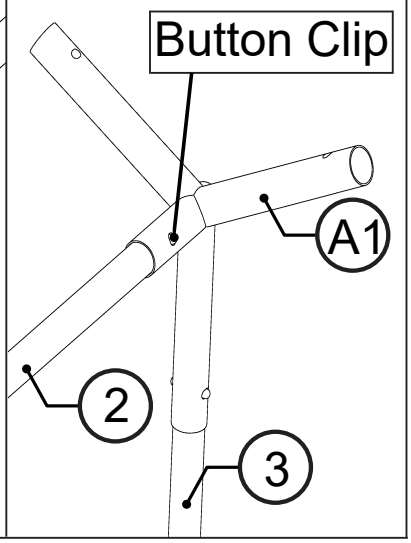

■ Note

When installing the A1 component, whether it is placed at the front or rear position, make sure that the front and rear holes are aligned horizontally, as the vertical short tube only has one set of holes. If the snap does not pop out when installing Component 2, adjust the A1 component according to the position of the snap.

D3	4
D6	2
H	16
K	8
L	8

x2

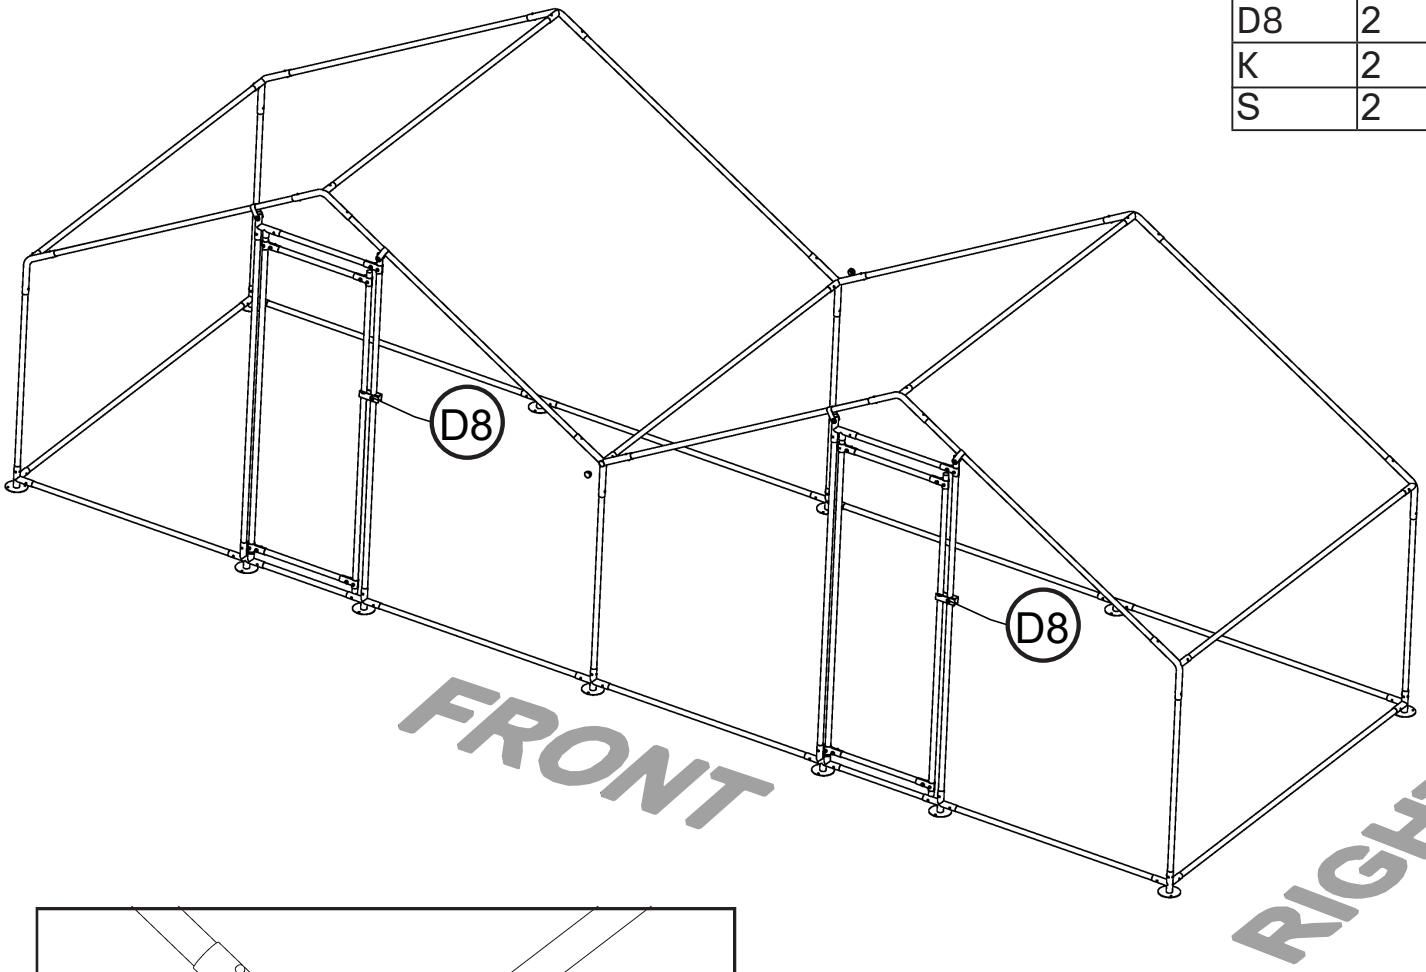

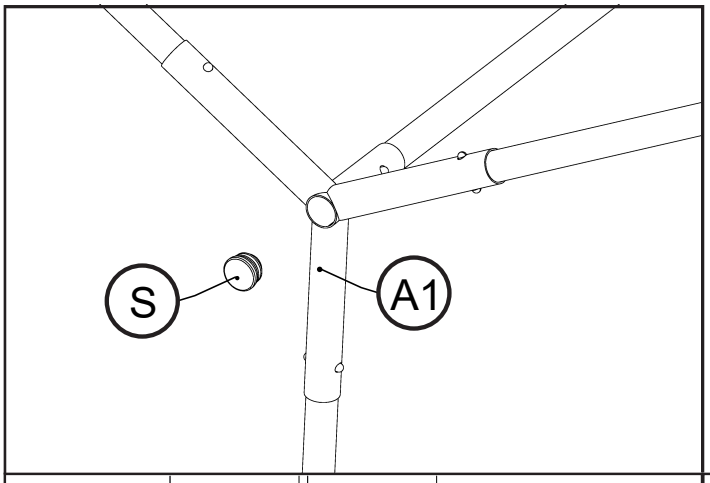

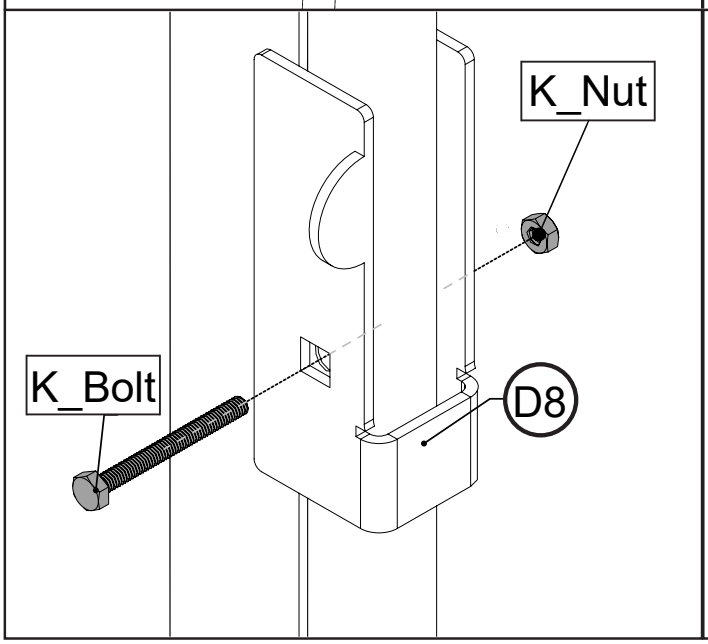

Note

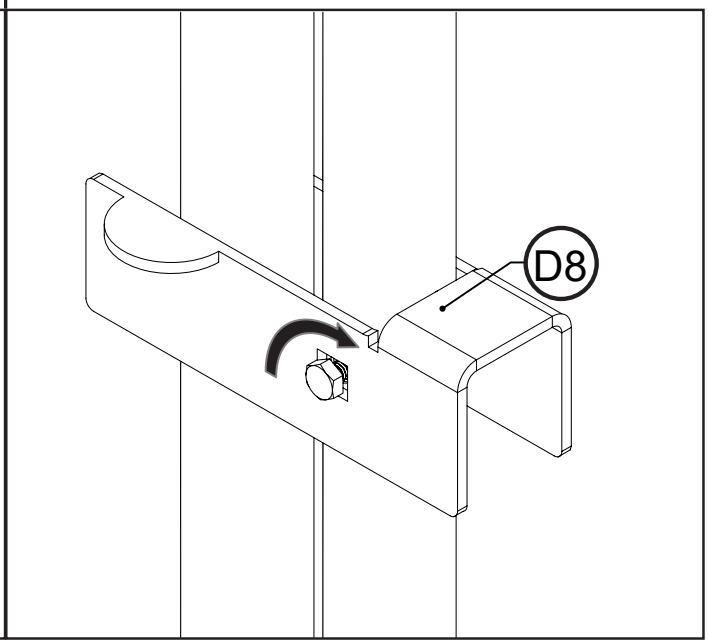

Do not worry too much about the exact location of D3 and D6. Just make sure D6 is completely covered by the two pairs of H.
Notice that on the two detailed illustrations above, screw L is not used,so that you have some wiggle room adjusting D3 and D6. Once you are satisfied with the result, use screw L to secure H.

Part	Qty
F	2

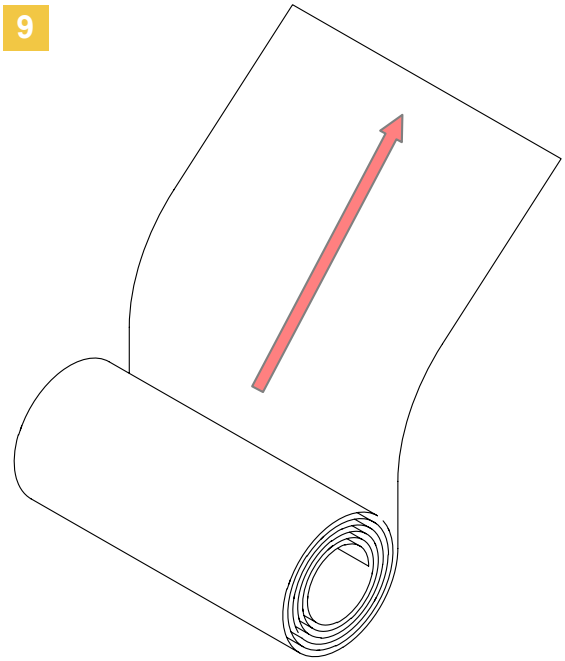

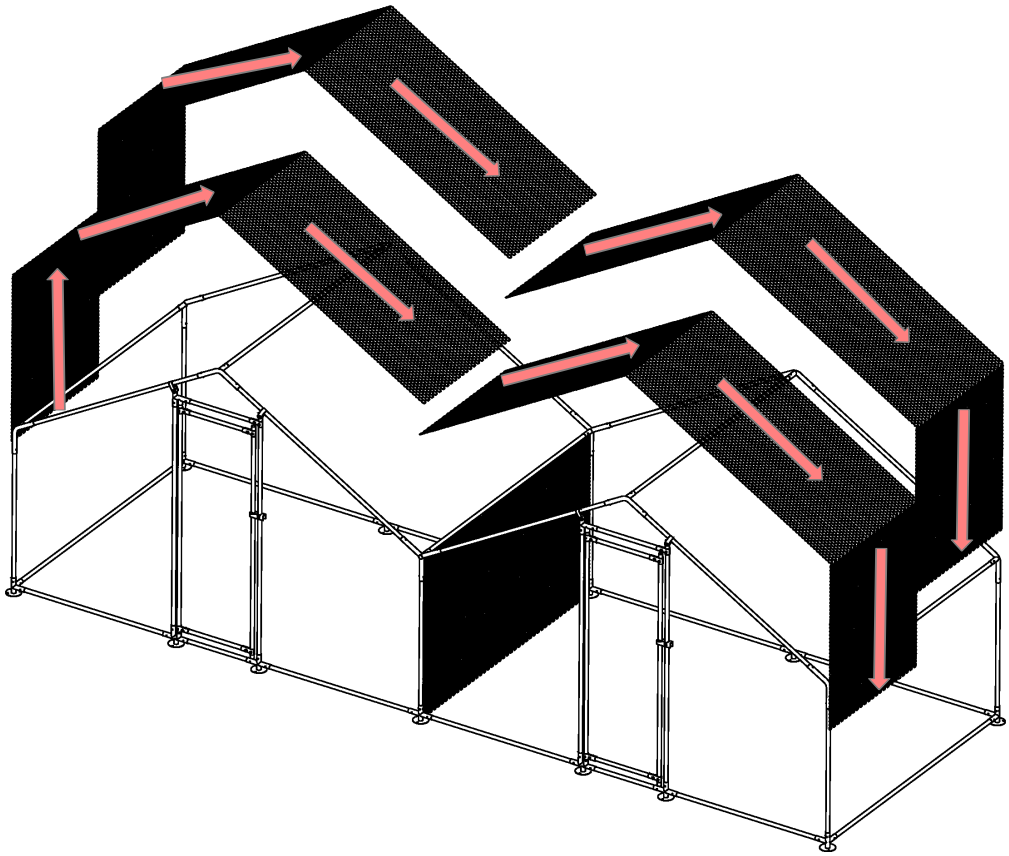

Note

If you want to raise chickens, ducks, or other small poultry at the same time, you need to use a mesh in the middle to separate them. If you are raising only one type of poultry, you can choose not to install a mesh in the middle.

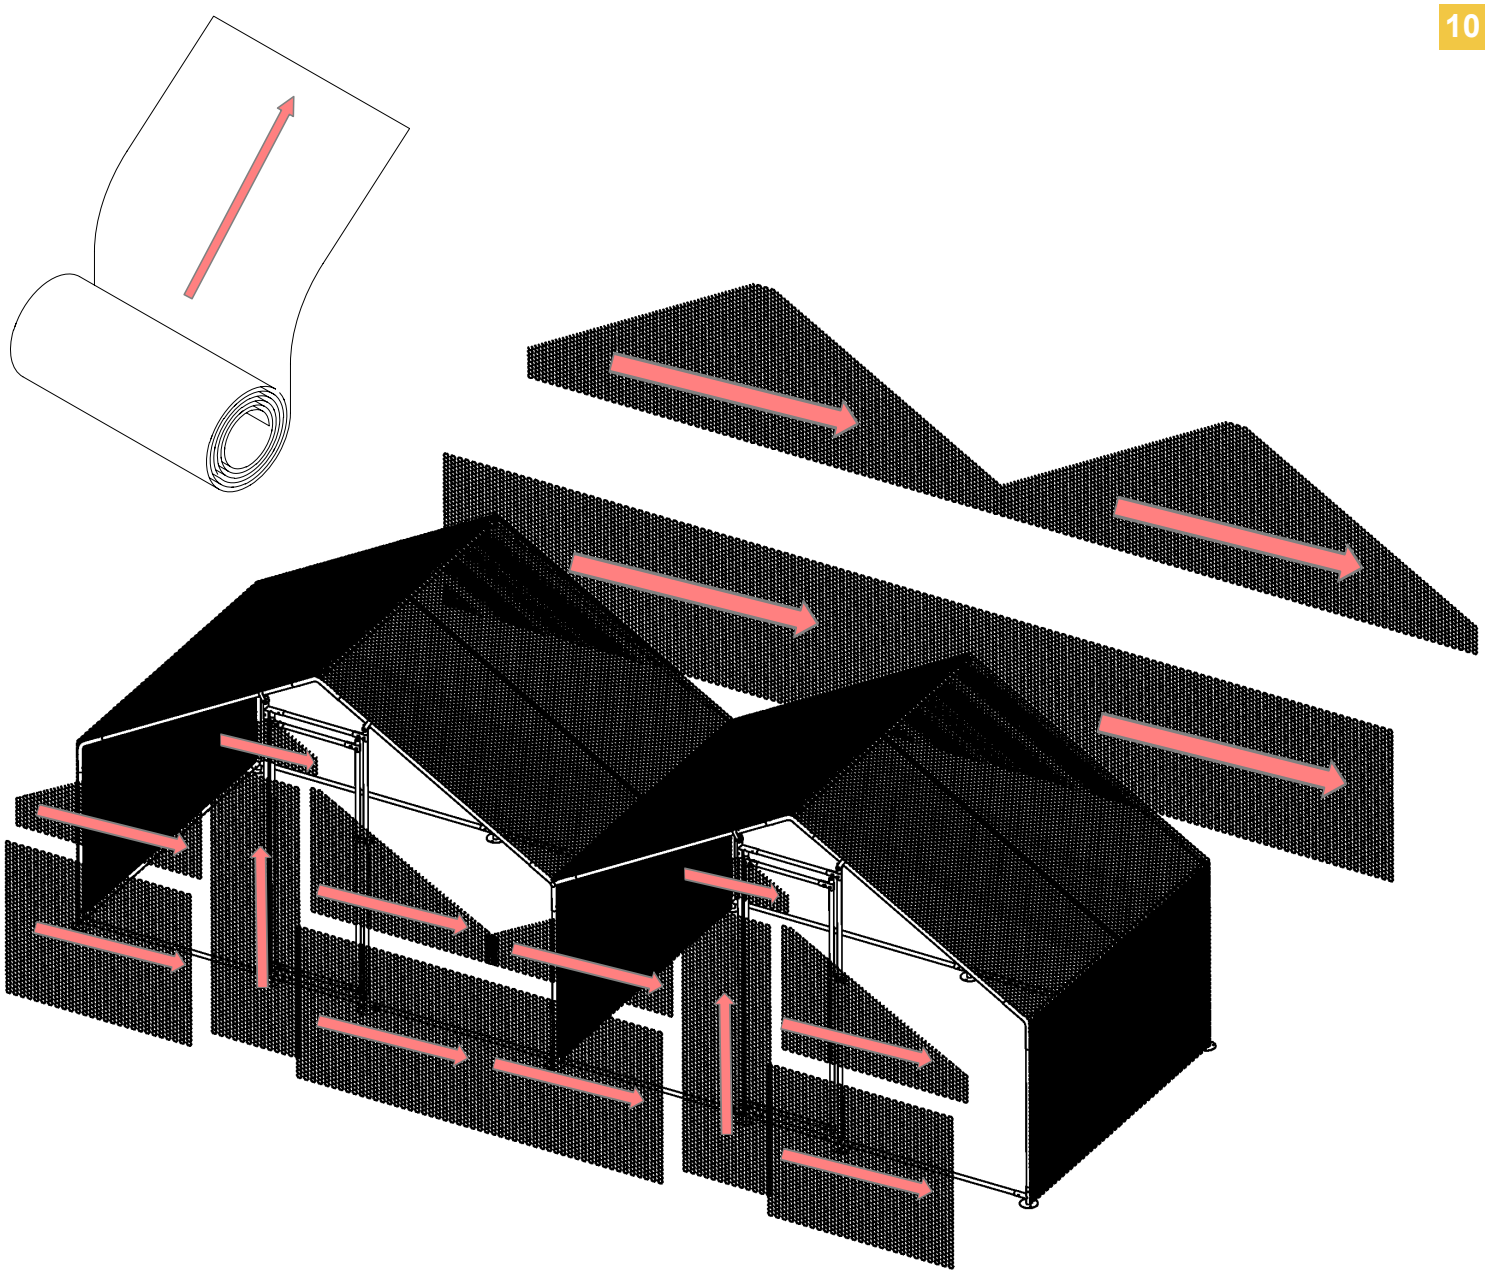

9

Note

In the package you will find the poultry net. When attaching the net to the chicken run structure, do not precut the net. Instead, roll the net along the tubes and cut it.
The arrows on the illustrations indicate the flow of the net. Follow the arrows to roll and cut the net. Use zip-ties to fasten the net to the tubes.

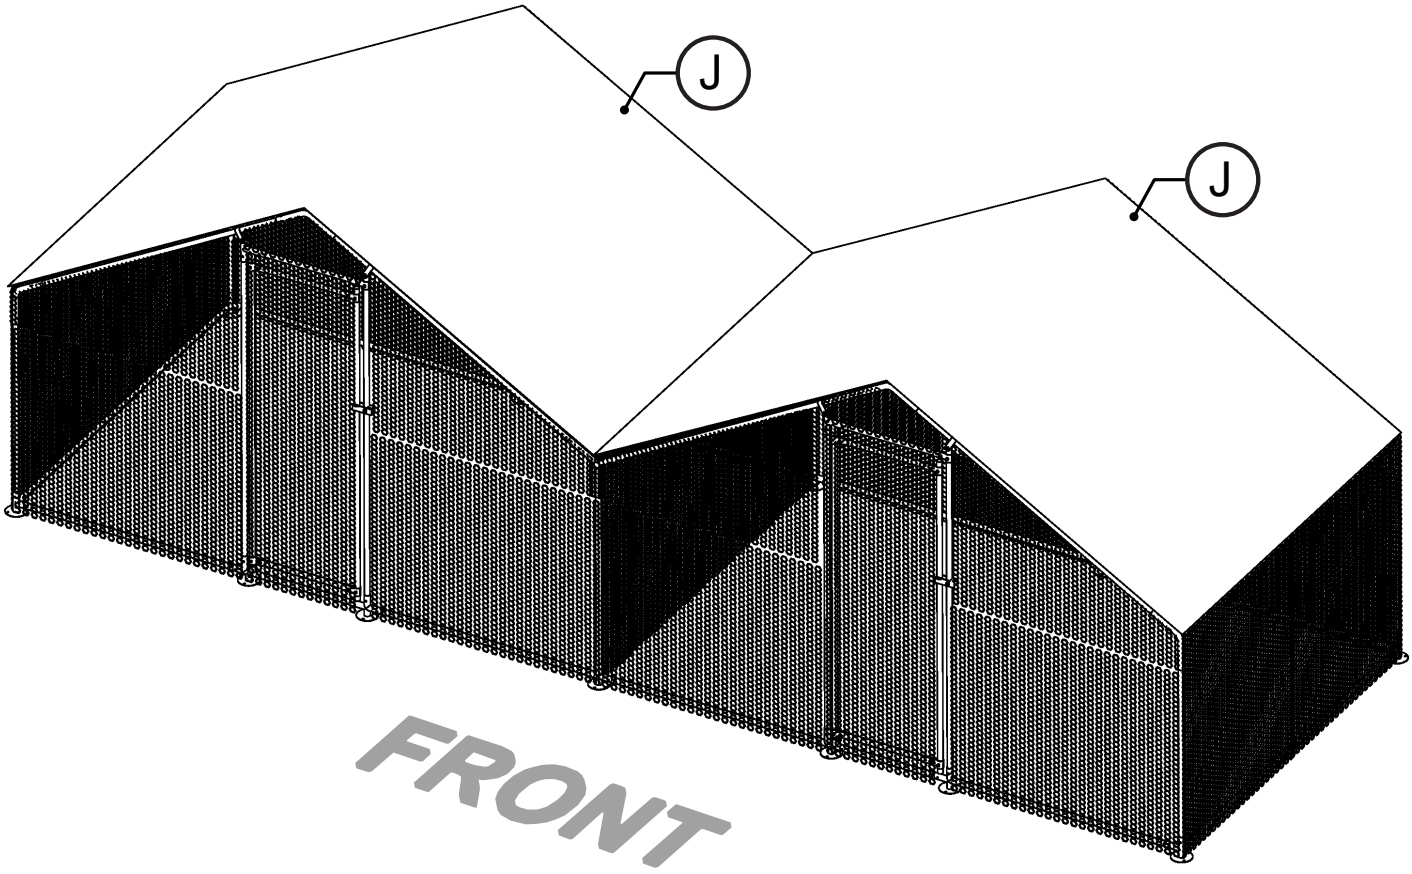

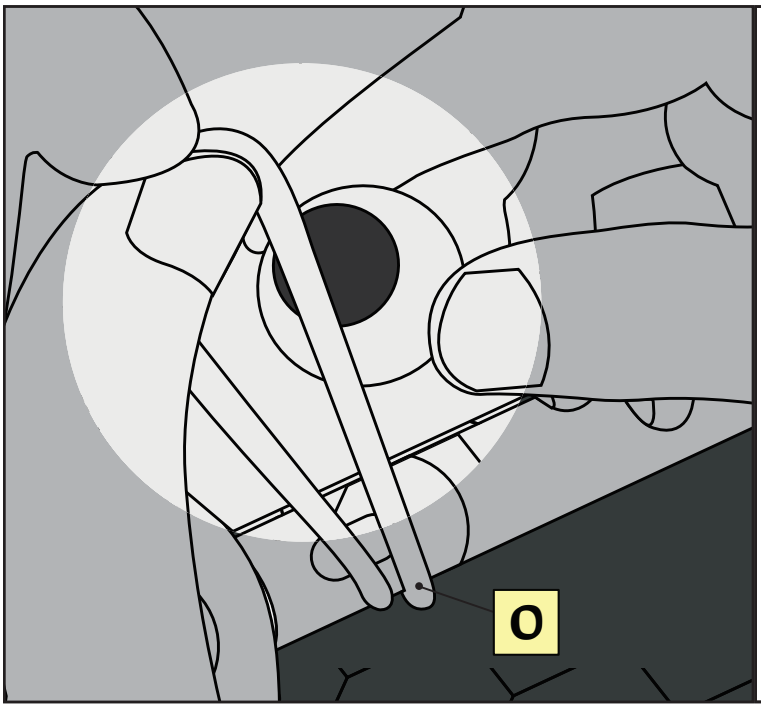

Note

For the net placed at the back of the chicken run, we suggest rolling the net roll without measuring or precutting the net like last step. For the net placed in the front, it's easier to measure and cut the net, and then fasten the cutted net to the tubes.
Notice that the rectangular shape in the front has a greater length than the width of net roll,meaning if you roll the net vertically, the roll will not be wide enough to cover the rectangular area. In summary, please follow the arrows to roll and cut the net.

11

Part	Qty
J	2
O	44

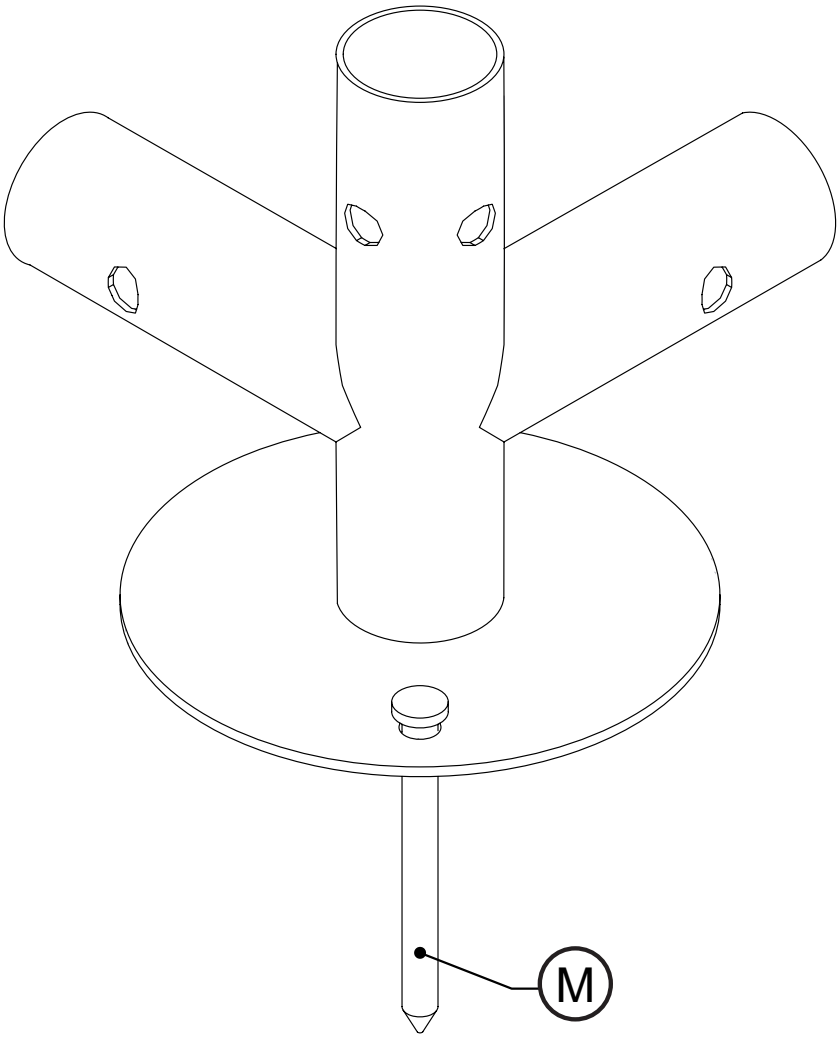

Note

The Tarp J is secured onto the structure by using bungee ball O. Use one bungee ball on each eyelet of the tarp. Pay attention that use two bungee balls for one grommet at the four corners.

Part	Qty
M	12

Note

When you feel like you have chosen a perfect spot for your chicken run and do not plan to move it, you can fix it to the ground by using the anchor M. Use one M in each four corners, , like C, D, E, and P.
