Battery Doorbell Plus

Next-level front door security, redesigned for rich 2K detail and true-color clarity, day or night.

- Retinal 2K with up to 6x Enhanced Zoom
- Head-to-Toe Video
- Live View & Two-Way Talk
- Motion Detection & Alerts
- Quick Release Battery Pack

Super clear. Built better.

At Ring, we don't just offer great resolution, we tune our cameras for clarity and low-light conditions - performance hardware and powerful processing working seamlessly together. The result? Crisp, true-to-life video from your property to your phone.

The big picture, plus the details.

Get a full view of your front door with Head-to-Toe Video that captures the whole story in Retinal 2K. When it's time to get closer, bring details into sharp focus with up to 6x Enhanced Zoom. From top to bottom or at the edge of the frame, details stay crisp and true-to-life.

Your doorstep never goes dark.

When light is scarce, Night Vision gived you a true-color view. Nearby street lighting is all you need. Night Vision automatically adapts to total darkness, revealing more detail in no-light conditions and lowering the overexposure and intensity of close-up objects.

Tech Specs - Battery Doorbell Plus (2nd Gen)

Size and Color	**Dimensions**	5.8 in x 2.11 in x 1.34 in (14.73 cm x 5.35 cm x 3.4 cm)

Frequently Asked Questions

Can I install the Battery Doorbell Plus (2nd Gen) without any wiring? Yes, the doorbell is designed for completely wire-free installation using the included rechargeable battery. If you have existing doorbell wires, you can optionally connect them to enable trickle charging and mechanical chime functionality, but wiring isn't required for full feature access.

What are my charging options? The Battery Doorbell Plus (2nd Gen) offers flexible charging options to suit your needs. You can charge using the included USB-C cable or connect to existing doorbell wires for trickle charging. The removable battery design also allows you to purchase a spare battery for uninterrupted coverage during charging.

What's the difference between daytime and nighttime video quality? The doorbell maintains consistent 2K resolution (1920x1920) throughout all lighting conditions. During daytime, you'll see full color, HDR-enhanced video. In low light conditions, true color low light sight works down to 0.25 lux, and in complete darkness, infrared night vision with adaptive brightness ensures clear footage.

How do I know when to charge the battery? The Ring app provides comprehensive battery monitoring, including real-time battery level display, low battery notifications, historical battery usage data, and estimated remaining battery life. We recommend initiating a charge when the battery level reaches 20% to ensure uninterrupted coverage.

Can I still use doorbell wires? Yes, when connected to existing doorbell wiring (8-24VAC), you'll benefit from continuous trickle charging of the battery, mechanical chime functionality, and extended battery life. Wiring is entirely optional and not required for accessing any of the doorbell's features.
