# Indoor Cam Plus

Ring's essential plug-in indoor camera, featuring enhanced image quality.

2K
Retinal 2K

Low-Light Sight & Adaptive Night Vision

4x Enhanced Zoom

Motion-Activated Notifications

Removable Lens Cover

**Catch the details that matter.**

Monitor your home with confidence. Indoor Cam Plus delivers 2K clarity and color around the clock, in any room you need. See every detail in full view. Manually zoom in up to 4x without losing any detail - perfect for spotting unusual activity in your home or checking if you left the stove on.

**See clearly, day or night.**

Get a colorful view of your home with Low-Light Sight and see every moment at its most vibrant - even in the near-dark. Minimal room lighting is all you need. Bright lights, dark corners? No problem. Indoor Cam Plus is built to handle the toughest lighting conditions.

**Privacy at your fingertips.**

Block your camera with a simple slide of the manual, removable lens cover. For even more privacy control, you can also turn off the microphone in the Ring App. Privacy Zones allow you to control what your cameras can see or record by blocking out off-limit areas in the Ring App.

## Tech Specs - Indoor Cam Plus

| | | |
|---|---|---|

1. Requires a compatible Ring subscription. Sold separately. 24/7 Recording is limited to 10 devices at one location. Not compatible with select features. Recordings are temporarily stored in the cloud, up to 14 days. This feature is dependent upon network connectivity and other factors.

## Frequently Asked Questions

**What is 2K video quality?** Indoor Cam Plus features Retinal 2K video quality, which means it captures footage at a resolution of 2560 x 1440 pixels.

**Will the camera automatically adjust video quality based on internet speeds?** Yes, the camera features adaptive bit rate streaming technology that automatically adjusts video quality based on your available bandwidth to maintain a stable connection.

**What's the Lens Cover and how does it work?** Indoor Cam Plus comes with a detachable lens cover in the box. When you need privacy, install the lens cover onto the camera and simply slide the cover in front of the camera lens. This blocks the camera's view and muffles the microphone for quick privacy. For complete audio privacy, you can fully disable the microphone through the Ring App. When you no longer need privacy, simply swivel the lens cover to the side. And if you ever forget whether you left the cover on, you can check the camera's live view in the Ring App to see if the lens is obstructed.

**How can I attach the Lens Cover?** Attaching the lens cover to Indoor Cam Plus involves three simple steps:
1. Align the lens cover in the unlocked position and insert the bottom peg into the groove at the bottom of the camera.
2. With the notch of the top ring of the lens cover facing towards the camera lens, push the cover onto the camera until you hear a click.
3. Press on the ring to secure it - you'll hear another click when it's properly attached.

**How can I mount Indoor Cam Plus?** You can simply place it on a table top or mount it on a ceiling or wall. With the easy-to-install mounting plate included in the box. Indoor Cam Plus goes exactly where you need it most.
