Assembly Instructions

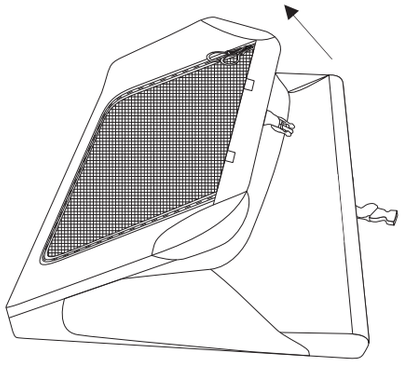

STEP 1

Lay folded brooder on the ground

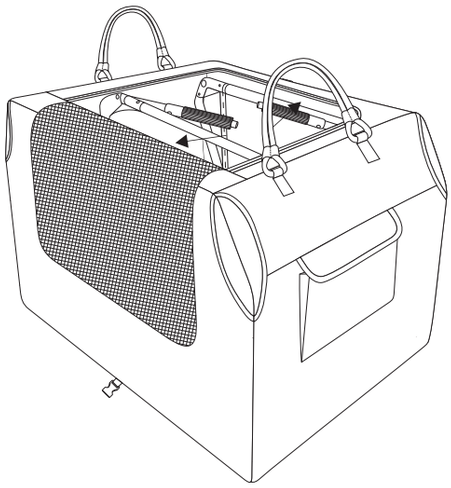

STEP 2

Unlatch the buckle to raise the two side panels.

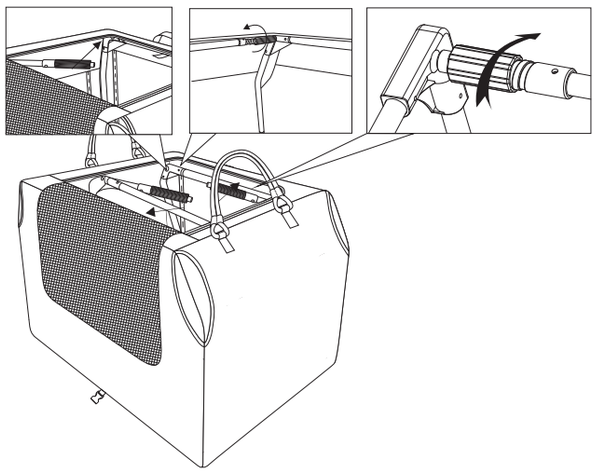

STEP 3

Unzip top mesh opening. Remove crossbars from their hook-and-loop security ties and swing them to their notch in the opposite corner. Imagebelow shows the twistlock in a retractedposition.

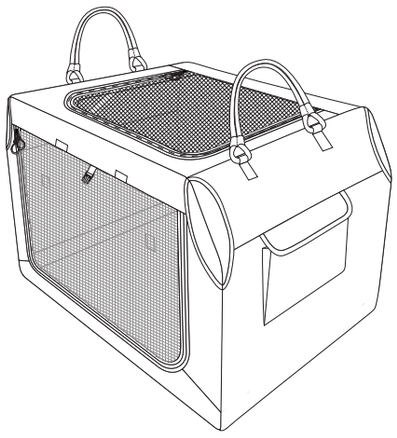

STEP 4

Align the crossbar post with the corner notch in the frame. Twist the lock to secure into place. Repeat with other crossbar. Twist lock is extended and fully activated when threads are visible.

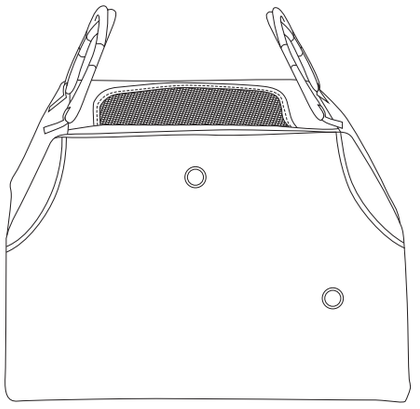

STEP 5

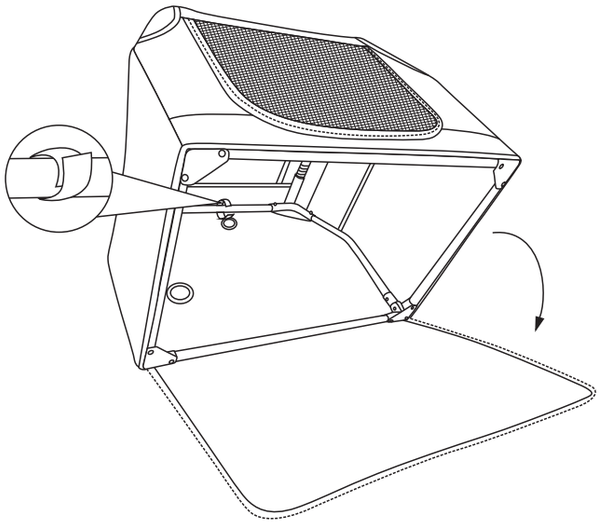

Secure the hook-and-loop straps around each of the long-side crossbars at the top of the frame. The crate is now ready for use.

Tip: Two rear eyelets for convenient accessory cable routing

Tip: For deep cleaning, fully unzip the bottom zipper and open the base panel. Before doing so, make sure the hook-and-loop straps around each long-side top crossbar are securely fastened to keep the internal frame in place during cleaning.

If you wish to remove the entire fabric cover for machine washing, first remove the plastic support board through the zipper opening on the side of the base.

GREEN BARN

POP-UP CHICK BROODER

designed for **10-15** baby chicks

S

W: 24" D: 18" H: 17"

designed for **20-25** baby chicks
