

Quality & safety

## Trust the Hill's standard

A proven commitment to quality and safety.

1

### Product development

More than 220 veterinarians, food scientists, technicians and PhD nutritionists at Hill's develop all of Hill's pet foods to meet the needs of your pets.

2

### Ingredient supply

We only accept ingredients from suppliers whose facilities meet stringent quality standards and who are approved by Hill's.

Not only is each ingredient examined to ensure its safety, we also analyze each product's ingredient profile for essential nutrients to ensure your pet gets the stringent, precise formulation they need.

3

### Product manufacturing

We conduct annual quality system audits for all manufacturing facilities to ensure we meet the high standards your pet deserves.

We demand compliance with current Good Manufacturing Practices (cGMP) and Hill's high quality standards, so your pet's food is produced under clean and sanitary conditions.

4

### Finished product

We conduct final safety checks daily on every Hill's pet food product to help ensure the safety of your pet's food.

Additionally, all finished products are physically inspected and tested for key nutrients prior to release to help ensure your pet gets a consistent product bag to bag.
